Essentials

Light Your Moment

We believe in helping
people light their
moments sustainably

by continuously pushing the boundaries of LED lighting technology. We design our products with people's experience at heart, to enhance everyday life, and build a better future. Every occasion matters, we don't make lights, we make moments.

We aim to
be carbon
neutral by
2030

Light a better future

Sustainability is at the core of everything we do

Our commitment to tackle environmental challenges means we are pro-actively taking action to minimise the impact of our materials used and operations, to build towards carbon neutrality.

Silver medal EcoVadis

Methodology built on international sustainability standards, EcoVadis are the worlds largest and most trusted provider to rate our business and provide you with transparency on environmental, social and ethical performance - or sustainability.

Recycling

- 100% of cardboard waste is either used as shredded packaging filler or recycled.
- 100% of plastic waste is used in bales or recycled.
- 100% of our warehouse pallets are recycled.

Energy from renewable sources

100% of our electricity all comes from renewable energy sources such as solar and wind turbines.

Waste experts partnership

We partner with waste experts to enhance our overall environmental performance.

- 100% of waste is diverted from landfill.
- 96% of waste is recycled, with the remaining 4% being recovered as energy from waste.
- Consolidating waste pick ups to minimise our carbon footprint.
- Euro 6 standard for all waste pick up vehicles.

Greener packaging

Reduce, re-use & recycle

As packaging is the most produced item to a business outside of the products themselves, we know how important it is to do everything we can to minimise the impact it has on the environment.

100% recyclable

- Our boxes are made entirely from card to make them easy to recycle.
- No plastics used to make our boxes (including the finish of the box).
- Vegetable oil inks are used to ensure they are recyclable.

FSC approved card

The card used in our boxes comes from FSC approved forests. This means that the card used to make the box comes from a replenishable forest and for every tree used another one is planted.

Less wastage

We make sure our boxes are designed to use as little material as possible to minimise their carbon footprint.

Less ink

Our new brown box design uses significantly less ink than a full colour box with images. When producing the packaging this makes the carbon footprint much smaller.

Fast reliable service

We're here to help you succeed

We believe you have the ability to create amazing projects and we want to help you achieve it. We pride ourselves on always being readily available to provide a level of service that gets you what you need to excel and achieve unbelievable things.

**Place an order
before 3pm**

**Free next day direct
to site delivery**

Free on site support

On large scale projects a member of our technical support team will go to your site to help plan your installation to ensure you have a smooth installation.

Free on the phone support

Readily available and with expert knowledge of our product portfolio our technical support team are on hand to answer any question you have about our products.

Online support

To ensure you get the support you need 24 hours a day we offer online support.

- Detailed product information on our website.
- Email updates to keep you informed.
- Literature available on our website.
- Product configurators to help you make the right choice easily.

No substitute for quality

You can be confident with us

Since we were established in 1901 we have been driven to deliver nothing but the highest quality in everything we do. We offer longer warranties and get third party accreditation to ensure you can trust in our products as we do.

LIA accreditation

The Lighting Industry Association Quality Assurance scheme is a quality assurance scheme developed by industry experts. The scheme assesses the members quality system and product compliance, and supports the member in achieving and maintaining the standard expected for LIA membership. Collingwood have been awarded the LIAQA Assured Company mark.

EDA accreditation

The EDA (Electrical Distributors' Association) is the trade association that represents the interests of wholesale distributors of electro-technical products in the UK. Collingwood are a product affiliate and together we work for the good of the sector.

Long product warranties

You can trust in our products as we do. We offer up to 10 year warranties on our products because we believe in our products. They all go through vigorous testing to ensure they are of the highest quality that will stand the test of time.

Two year on site warranty

We offer a two year on site warranty for all **commercial** and **industrial** lighting products.

We test all
our products
in our own
**state of
the art lab**

What's new?

Take a look at all of our new additions

We continuously push our product portfolio to make sure you have the best possible lights for your installations, with an emphasis on quality of light and ease of installation.

H2 Sense

PIR Downlight

Pages 22-23

Now available in brushed steel finish. Integral emergency also available.

H2 Deco

Baffled downlight

Pages 24-26

Architectural downlight with baffle for visual comfort

Versa Tile

Suspended linear

Pages 80-82

Low profile up/down light which has just a 38mm depth

Linear Cell

Light line

Pages 84-85

Standalone or continuous run up to 20 luminaires from a single feed

Uniform Versa

UGR 19 Classroom solution

Page 90

Wattage switchable linear with outstanding lit effect. Versa plug n play kits for emergency and sensor options.

Caiman Versa

Anti-Corrosive

Pages 150-155

Wattage & colour switchable anti-corrosives with unique installation feature

Hydra

Modular Bollard

Pages 117-121

Interchangeable heads to make for easy stocking. Wattage & colour switchable.

K3

Industrial floodlight

Pages 192-194

9,500 - 44,000 lumen output suitable for coastal applications

Residential downlights

Residential downlights

H2 Lite, H2 Pro Extreme CSP and H4 Lite

Upgradeable, Re-useable, lights that lasts

With approximately 5 million units supplied to a wide range of customers, H2 Lite, H4 Lite and H2 Pro Extreme have a proven history of excellent performance, fast installation, and lifetime you can trust.

Our next generation design builds on this further to offer the below new feature and benefits:

- Optimised design with no waste, minimizing the use of materials and impact on the planet.
- FSC certificated packaging ensure minimal waste.
- NEW unique interchangeable design which allows the driver to easily be replaced should it fail.

Backed by an industry leading warranties and should you have an issue, replacement drivers are stocked in the UK for quick after sales support.

Colour switchable product

One light, three or four colour temperatures

Always have the correct product on hand. Our range of colour switchable downlights are available to stock in 3 or 4 colour temperatures in 1 product (2200K, 2700K, 3000K & 4000K).

Advantages

- Simpler product range.
- Products can be adjusted after they are installed.

Use the CCT switch to choose the ideal colour for your installation.

Insulation coverable

Install the product directly under insulation

Many of our downlights are insulation coverable, suitable for both rolled and blown installation.

Advantages

- Quick & easy to install.
- No need to buy insulation protectors.

I-joist and metal web approved

Perfect for every installation

Our downlights have undergone vigorous testing to ensure they are perfect for use with I-joists, metal web and solid timber ceiling types.

Strip lights

Strip lights

Standard strip range

Our standard LED strip utilises constant voltage, making it the perfect solution for shorter distances as there will be no loss of light output up to 5m.

Choose from:

- 2 IP ratings (IP20 & IP44)
- 2 wattages (4.8W & 9.6W)
- 3 colour temperatures
- (2700K, 3000K and 4000K)
- Max run up to 5m
- Bespoke lengths, perfect for specific installations

50m reel packaging

We offer 50m reels of LED strip in an easy to dispense packaging. Simply pull out as much LED strip as the customer needs and cut at a cut-point.

We offer the 50m reel packaging with the following LED strip:

- LSV02 (IP20, 4.8W)
- LSV05 (IP20, 9.6W)

Easy installation

The new LSK connector series gives an invisible and secure option to join and power strip simply using a pair of pliers, avoiding the need to solder.

LSP strip

High Lumen output

LSP has a nearly unprecedented lumen output of approx. 2000lm/m. This allows you to use LSP as the primary light source in a room, and as it can easily be dimmed with the correct driver, gives you full flexibility to tailor the lighting to your current need.

238 chips per metre

With nearly twice as many LED chips as standard LED strip, LSP gives an incredibly even light, and will appear “dotless” in most profiles, avoiding unsightly spotting.

LSP

Standard

High efficacy

With up to 160 lumens per watt, LSP is our most efficient strip to date, and one of the best in the market. It is also fully compliant with upcoming BEIS legislation.

Neon strip

Side Vs Top bending

Side bending strip is ideal for use alongside the creation of cylindrical shapes within indoor and outdoor applications. For example, around water features, bars and columns.

Top bending strip is ideal for use in the creation of rounded corners in architectural and landscape features. Long linear light patterns in creating secondary lit effects is an effective use of top bending strip.

IP67

Ideal for use in outdoor areas making it the perfect choice for landscapes and wet environments.

IK08

We've made out neon strip durable to withstand tough environments making it perfect for use in landscapes.

Strip lights

- 2000lm

Bright enough to be the main, or primary, source of light

Connector & profile accessories

Find the ideal connectors for your strip

Use the matrix to find the perfect connectors for your LED strip

Strip to strip

Strip to strip connectors connect one end of the strip directly to another end of strip creating an almost seamless transition from one piece of strip to the next.

Strip to strip with fly-leads

Connect one piece of strip to another with the flexibility of having fly-leads between them.

Fly-leads

Use a connector that adds fly-leads to your strip to connect your strip to a power supply.

End cap

This is needed at the end of neon strip to complete the circuit.

L bend

Perfect for connecting strip directly to strip on a corner.

Residential floodlights

Quick & easy installation bracket

Circular first fix bracket

The circular bracket is detachable and can be mounted to the surface before the rest of the product, allowing for a remarkably easy installation. The product is then simply bolted on to the bracket and the installation completed.

Advantages

- Quick & easy installation.
- This bracket is for first fixing onto the wall, and because it's circular, there is no need for spirit level.
- 360° rotation, allowing the floodlight to be installed in a variety of applications.
- Pre-wired with 1m cable.

360° rotatable and 180° tiltable

Flexibility and reliability

Combining 360° rotation and 180° tilt, this light can be pointed in any direction, ensuring you can illuminate a space from any position.

360° rotation

The product has a circular bracket at the end which allows it to be rotated in any direction. Once installed onto a wall, the light can be pointed in any direction with ease.

180° tiltable

The bracket directly attached to the floodlight allows the product to tilt both upwards and downwards.

Advantages

- Illuminate space from any direction.
- Can adjust into correct area after it's installed.

CCT switchable

One light, three colour temperatures

Our range of colour switchable floodlights allows you to stock 3 colour temperatures in 1 product (3000K, 4000K & 6500K).

Advantages

- Simpler product range.
- Products can be easily adjusted after they are installed thanks to a convenient IP65 switch on the back.
- Always have the correct product on hand.

3000K

4000K

6500K

IP65 directional PIR sensor

PIR sensor: Passive infrared sensor

The IP65 rating provides optimum protection against the impacts of rainwater and general adverse weather conditions. The PIR sensor can rotate, meaning that the activation can occur in a different area to where the floodlight illuminates. For example, the sensor could be pointed to a door so that when a person exits the building a separate walkway is illuminated, increasing safety.

Advantages

- IP65 rated sensor ideal for adverse weather conditions.
- Sensor rotates allowing the activation to occur in a different area to the illumination.
- Easily adjust motion sensitivity, lux levels and time required on the sensor.
- Save your customer energy and money.

Coastal protection

Rust & salt mist protection

With corrosion resistant protection and coastal protective paint, our floodlights are perfect for use in coastal areas.

Advantages

- Feel confident you can install these floodlights anywhere.
- Can be installed into coastal areas without any worry of products failing.

Floodlights

- 130lm/W High efficacy of up to 130lm/W
- First fix bracket for quick & easy installation
- Ideal for coastal areas

Panel accessories

Easily install panels anywhere

The surface mount frame is an ideal solution to mount panels in places without suspended ceiling grids, and where recessed mounting is not possible. The suspension kit allows the panel to be suspended from a ceiling, which is ideal for situations where recessed mounting is not possible. The emergency pack turns your panel into an emergency version.

Use the tables below to choose the perfect kit for your installation

Type	Use with 600 x 600mm panels	Use with 1200 x 300mm panels	Use with 1200 x 600mm panels
Surface mount kit	 P2SMA	 P2SMB	 P2SMC

Surface & Suspended

Commercial

Commercial

Surface & Suspended

Choice of finish

Choose the ideal colour for your installations aesthetic.

Linear (Vera Tile & Linear Cell)

Versa Tile is available in all 3 colour finishes and Linear Cell is available in White and black, making them work with any installations aesthetic.

White

Black

Silver

Choice of form

Choose the shape of fitting that is ideal for the environment it is going into.

Linear fittings

Perfect for matching up to the building architecture of the windows and furniture.

1200mm
Versa Tile

1500mm
Linear Cell

Shallow depth (Versa Tile & Linear Cell)

Designed to have a shallow depth for an architectural look.

Versa Tile
Shallow depth of 38mm

Linear Cell
Shallow width of 50mm

Choice of lit effect (Versa Tile & Linear Cell)

Choose between Versa Tile and Linear Cell to create the ideal lit effect for your installation.

Direction of light

Versa Tile

Up-down light (75% DLOR, 25% ULOR) for a decorative lit effect on your ceiling.

Linear Cell

Downward lit effect (100% DLOR).

Stand alone Vs Continuous light

Stand alone

Provide individual light and control for your users so they personalise what they like.

Continuous light

Creates lines of light up to 20 metres long using a single electrical feed.

Versa Box (Versa Tile)

The Versa Box is a uniquely design compartment to house all of the components at either end of the Versa Tile. Through-wired, this makes it easy to plug-in different drivers, sensors and emergency packs to suit your project needs and makes the product very easy to repair, replace or upgrade.

Surface & Suspended

-  Slim depth of just 38mm
-  UGR19 for low glare
-  75% down / 25% up ratio uses light efficiently

Battens

Commercial

Commercial

Uniform | Uniform Versa

Wattage switchable: one light, four wattage outputs

Wattage switchable product enables one luminaire to meet various lux levels within a project using a lumen output switch.

20W | 30W

23W | 35W

26W | 40W

30W | 45W

IP44 & IK08 | IK06

High impact resistance ensures that accidental collisions will not adversely effect the performance of the product. Combine this with IP44 rated allows the product to be used in a wide range of applications

IK08

IP44

Borealis easy installation

Quick release button

The quick release buttons makes installation simple. Located on each end, and either side, they open up the batten tray to separate the diffuser and the gear tray from the base, with the hanging clips in place to ensure added convenience.

Emergency bolt-on & PIR bolt-on sensors

The bolt-on's convert your Uniform linear or Borealis batten into an emergency, dimming or motion sensor. The PIRBOLT allow the user to set up on/off control or PIRBOLTDIM allows two step-dim parameter.

Up to 6m high

Install as high as 6m high.

Quick attachment

Fast 4 minute conversion time.

Easy attachment

M20 interface for easy installation.

LiFePO4 with 2-year guarantee

Long lasting battery.
(Emergency bolt-on only)

On/Off PIR control & daylight switching

Save energy and money.
(PIR bolt-on only)

EMBOLT...

PIRBOLT

PIRBOLTDIM

20mm Cable entry

There are conduit/cable gland entry points from either side and the back of the fixture, which enables this product to satisfy many installation requirements, giving the option to conceal wiring behind the fixture or link them together via their loop-in loop-out terminal.

Rear cable entry

Side cable entry

BESA mounting options

The battens can be mounted either directly on the surface, through the pre-drilled holes on the base of the fitting, or suspended via a hanging kit. The gear tray is can be removed entirely or it can be suspended from the base, whilst you work to mount.

Commercial downlights

Commercial downlights

Thea Pro

Downlight

Offers two options from 145mm to 180mm and 165mm to 200mm making it a truly versatile product.

Advantages

- Ultra efficient 142Llm/W ensure low running costs
- UGR19 compliant low glare lighting when insert is used, snap fit accessory for ease of installation.
- DALI-2 drivers available to make your fitting dimmable.

Converter plate (Thea Lite CSP and Pro only)

Retro-fit downlights

Easily retro-fit your commercial downlight by using a converter plate. Simply place the downlight into the converter plate and the product will fill a hole Ø240-290mm.

Advantages

- Easily install downlights into ceilings with cut-outs too large for our products.

Product Code	Compatible with
DL801MW	Thea Lite CSP 200mm and Thea Pro 165-200mm

Thea Lite CSP 3 products in 1

CCT switchable: one light, three CCT temperatures

Our range of colour switchable downlights allows you to stock 3 colour temperatures in 1 product (3000K, 4000K & 6000K / 6500K).

Advantages

- Simpler product range.
- Products can be adjusted after they are installed.

3000K

4000K

6500K

CDL 6 products in 1

Wattage switchable & CCT switchable: one light, two wattage, three CCT temperatures

Our CDL02 is a wattage switchable downlight, which allows you to stock 2 wattage outputs in 1 product.

Advantages

- Simpler product range.
- Products can be adjusted after they are installed.

Lower output

Higher output

Commercial
downlights

- 142lm/W

Highly efficient 142 Llm/W ensures low running costs
- IP65

IP65 protected as standard, suitable for bathroom zone 1
- UGR19 or UGR22

UGR19 compliant low glare lighting when insert is used

Guarantee	5 years (product), 3 years (emergency)
Wattage	10W
IP rating	IP65
Dimmable	Yes (DALI-2, PUSH-DIM)
CRI	CRI>80
TP rating	TP(a)
Input	220-240V AC
Emergency version available	Yes, using converter
Install connector type	Push-fit terminal, loop-in/loop-out
Cut-out size	145-180
Electric class	2

Install connector type	Flying lead
Cut-out size	120-200
Electric class	2

Commercial outdoors

Perimeter lighting

Energy savings

Automatically switch the light **off** during daylight and when there is no presence to save energy.

Advantages

- Save energy
- Save money

Motion detection (Halo)
Turns light on with movement.

Daylight switching
Holds light off during daylight hours.

Warmer light

2200K **Ember** light

Minimising the blue light content of outdoor lighting is key to improving the survival and growth rates of nocturnal animals.

That's why Collingwood is introducing outdoor lighting with 2200K. The amount of blue light in 2200K is significantly less than 4000K or even 3000K.

Complete exterior solution

Our range of outdoor exterior lights designed to work perfectly together.

Arc / Arc Pro
Perimeter light

Halo
Entrance light

Tilt
Building / Landscape light

Fountain
Pond light

Hydra
Pathway / Car park light

Hydra bollard

Choosing the ideal Hydra bollard

For your installation

Use the four easy steps below to select the perfect bollard for your installation.

1

Bollard heads

Standard - **HYB1CONEB**
Photocell - **HYB1CONEBPC**

Standard - **HYB1CONES**
Photocell - **HYB1CONESPC**

Standard - **HYB1OPALW**
Photocell - **HYB1OPALWPC**

2

Bollard post & ground kit

HYBxBOLLARD*
Including post, base and ground fixing kit

3

Ground fixing options

HYBxBOLTKIT
Concrete

HYBxBROOTKIT
Soft ground

4

180° Spill light kit

HYBxBSPILLKIT
Transforms your 360° light into a 180° light output

• This is required for your bollard installation, unless you are fitting the head to an existing post of the same diameter.

Hydra accessories

Make your bollard perfect for your installation

When ordering your bollard head, you must order HYBxBOLLARD (post and ground kit)
See other accesories below

	HYBxBOLLARD	HYBxBOLTKIT	HYBxBROOTKIT	HYBxBSPILLKIT

Bulkheads

Bulkheads

Bulkheads

CCT switchable: one light, three CCT temperatures

Our range of colour switchable bulkheads allows you to stock 3 colour temperatures in 1 product (3000K, 4000K & 6500K).

Advantages

- Simpler product range.
- Products can be adjusted after they are installed.

3000K

4000K

6500K

Lumen switchable: one light, two lumen outputs

Our range of lumen switchable bulkhead allows you to stock 2 lumen outputs in 1 product.

Advantages

- Simpler product range.
- Products can be adjusted after they are installed.

Lower output

Higher output

Quick & easy installation

All our bulkheads come with push-fit terminals for quick & easy installation.

Advantages

- Quick and easy to wire up.

The WL94 and WL95 come with push-fit terminals.

The WL94 comes with a removable twist and lock panel for easy access.

The WL94 comes with a detachable bracket for quick and easy installation.

Advantages

- Easier to install. Attach small bracket onto the wall and easily clip the bulkhead onto the bracket afterwards.

Simply push the quick release button to detach the bracket.

You can mount the bracket to the surface and then easily attach the bulkhead.

Microwave step-dim sensor

The sensor detects movement from up to 6 meters away and allows the user to set up two step-dim parameters, reducing the light output during stand-by period, saving energy whilst maintaining ambient illuminance for a prolonged period, until turns off, offering full control of the luminaire light output and the time it is on.

Sufficient daylight

With sufficient daylight, even when movement detected, light remains off.

Insufficient daylight

With insufficient daylight, when movement detected, light turns on.

Hold time

After last detection, light will be dimmed down to stand-by dimming level.

Stand-by period

After stand-by dimming level period, light turns off.

Emergency range

The Collingwood emergency range is safe, reliable and full of market leading performance features. It has low operational running costs across the long product lifetime. The complete range features bulkheads, exit boxes, exit blades, escape routes and twin spots, all complying with ISO 3864-1.

① Blade ② Box / Bulkhead ③ Route ④ Max

Conduit M20			●		●	●	●
BESA			●			●	
Open area lens				●			●
Corridor lens				●			●

Self-test vs. Manual test

Regular tests need to be conducted on the emergency fittings to ensure they are still performing correctly. The two tests which need to be conducted are for emergency light operation and the battery duration. There are two methods of conducting this test, a manual test and a self-test.

Manual test

A manual test can be performed locally by pressing the product test button that forces the emergency luminaire to go into emergency mode, or by switching off the mains.

The inspection is done in real-time, visually, by the operator in charge of the test.

Self-test

The self-test unit automatically performs numerous tests in the background. Any failure is indicated by the LED, that can start to blink or change its colour, depending on the product type.

The inspection is done by visually checking the LED indicator status.

The inspection frequency tests required are determined by EN 50172, which our products comply with. It should last as long as it is needed to make the emergency light source turn on, so in case of our products, only a few seconds.

The battery duration test should be performed at least yearly. It should last for the rated battery duration, so for manual test products, it has to be executed when there is a minimum risk for the occupants.

	Emergency Blade	Emergency Box	Emergency Bulkhead	Emergency Route	Emergency Twin spot	Salvus Max	Salvus Surface
Self test	●	●	●	●	●	●	
Manual test	●	●	●	●		●	●

Maintained vs Non-maintained

Maintained

These are when the fittings are on all the time, like a normal luminaire. These are mains powered and have a battery backup, which keeps the lights on in the event of a power failure. For example, the emergency blade is maintained, so if for any reason there is a power failure the emergency blade will stay lit using the battery backup.

Non-maintained

These only turn on in the event of a power failure. There is a set duration that the light will be live for, which depends on the battery and product type. For instance, our escape route emergency luminaire light remains off and only turns on when the mains power goes down.

Emergency lighting

-  LiFePO4 battery available

Anti- corrosives

Wattage & CCT switchable

Wattage switchable: one light, two wattage outputs

Caiman Versa provides both the output of a single and a twin anti-corrosive within the same product.

Advantages

- Reduces stockholding from twelve luminaires to be three.
- Adjust using DIP switches on the driver during installation.

Product	Single output		Twin output	
Caiman Versa 4ft	18W	2590 - 5500lm	37W	5180 - 5550lm
Caiman Versa 5ft	28W	3920 - 4200lm	56W	7840 - 8400lm
Caiman Versa 6ft	33W	4690 - 5025lm	67W	9380 - 10050lm

CCT switchable: one light, three CCT temperatures

Our colour switchable anti corrosive allows you to stock 3 colour temperatures in 1 product (3000K, 4000K & 5700K).

Advantages

- Customer can choose which colour they prefer.
- Adjust using a switch during installation.

3000K Warm White

4000K Cool White

5700K Daylight

Time saving installation

Fully flexible first-fix bracket

A unique full mounting slider which spans the full length of the luminaire on the back of the housing. The feature removes the need for measuring up where to place your bracket drill points because the bracket can go anywhere on the slider.

Mounting options

Caiman Versa

Caiman Versa is suitable for when the mains cable entry is fed via the rear or the side conduit of the product. It can be mounted to BESA using accessory ACBESA or using the standard bracket supplied, installed on ceilings, walls or suspended on chain.

Caiman Quick Connect

Use this solution when the mains cable entry is fed via the side conduit entry to avoid the need to open any clips or luminaire to install it! Just remove cap, push-in your wires to the connector and screw on the PG Gland.

Dimmable

0-10V, PUSH DIM

High bays

Springbok Lite

Economical high bay for fast return on investment

Energy savings

Payback as quick as 2 months

Provide slightly more light, whilst using much less power, resulting in excellent cost savings and quick payback.

Springbok Lite	Replaces old HIT / HSE fittings	Replaces T5 fitting	Energy savings
200W	400W	2 x 80W	Saving up to 46%
150W	250W	4 x 49W	Saving up to 54%
80W	150W	2 x 80W	Saving up to 43%

Adding lighting control can save up to 82% of your existing energy usage.

Refractor accessories

Boost your light distribution by 20% with a decorative refractor. Reduces glare to <UGR22.

HBL1REFR
For 80W product

HBL2REFR
For 100W product

HBL3REFR
For 200W product

Microwave sensors

For up to an additional 82% energy savings

For added control and energy savings use a microwave sensor kit. Product code : **HBLMWS**

Motion sensor

Only turn your light on when movement is detected.

Daylight switching

Only turn your light **on** when there is not enough natural light.

Quick & easy installation

Kit includes a junction box for cabling and counter weight for balance.

Quick & easy installation

Pre-wired with 1.5m of H05RN-F cable for ease of installation.

IP65 & IK08

High impact resistance ensures that accidental collisions will not adversely effect the performance of the product. Combine this with high water and dust resistance and it means that the range of installation environments is vast.

Warranty

Long warranty for piece of mind.

4 year guarantee

2 year on-site warranty

Area Bay

Designed to perform, built to last
& connected to save energy

Best practice for energy & cost savings

Save energy & money on your project by following these 3 easy steps, and make savings like the example below.

1 Quality optics

Light the space using less fittings with our unique lens optic, designed to direct the light where it is needed.

Efficient lighting design

2 Motion detection

Use our **HBPIR** or **HBMWS** motion sensor to ensure your light is only on when a person is detected.

Save up to 60%

3 Daylight detection

Enable daylight switching, or if your zone is automated, daylight harvesting, to ensure your electric light works in sync with the natural light within the space.

Save up to an additional 22%

Energy rate £/kWh: £0.37	Existing fitting	1 Collingwood fitting	2 Collingwood fitting with motion sensor	3 Collingwood fitting with motion sensor and daylight detection
Average lamp life	12,000 hours	54,000 hours	54,000 hours	54,000 hours
Quantity of fittings	100	100	100	100
Watts per fitting	400W	150W	150W	150W
Energy £/Year	£106,649	£48,922	£19,569	£8,806
Energy savings £/Year	-	£57,727	£87,080	£97,843
Energy savings over 5 years	-	£288,635	£435,400	£489,215

Quality optics

To light a space efficiently, a luminaire optic must be designed to direct the light to where it is needed. Our unique lens optic changes the light distribution to create the perfect wide beam application.

Less fittings required providing energy and cost savings.

Motion sensors - Quick & easy installation

Save time on the installation ultimately savings costs on installation.

Quick tool-less connection

Tool-less, plug-in and twist sensors make installation quick & easy for you to adopt lighting control, even interchange your sensors should your floorspace be re-configured.

Takes under
3 seconds

Installation is
Tool-less

Simple & easy remote

Commission your Area Bay from the floor.

Hold Time: how long the light stays on after movement is no longer detected
Stand-by Dimming: what level the light should dim to after movement is no longer detected
Stand-by Period: how long after no movement is detected, does the luminaire wait until switching off
Detection Range: enables you to adjust the sensitivity of sensor
Daylight Threshold: set to only switch the light on when the natural light in the space is insufficient for the task

PIR Vs Microwave sensors

It's important to know when to choose between a PIR sensor and a Microwave sensor.

PIR sensor

Ideal for use in aisles.

Perfect for avoiding nuisance triggering in areas that may have vibrations.

Product code : HBPIR
with daylight switch

Product code : HBPIRDL
PIR with daylight harvest sensor

Microwave sensor

Ideal for use in open areas.

Perfect for areas that need to trigger when the sensor is not in a direct line of sight.

Product code : HBMWS
with daylight switch

Area Bay

Designed to perform, built to last
& connected to save energy

Refractor accessories

Boost your light distribution by 20% with a decorative refractor.
Reduces glare to <UGR22.

HBA12REFR
For 100W - 150W product

HBA3REFR
For 200W product

HBA4REFR
For 240W product

Step-Dim

Our sensor can signal the light to switch **off** when no motion is detected, or DIM down to a low level to avoid complete darkness and help safety.

Warranty

Long warranty for piece of mind.

5 year
guarantee

2 year on-site
warranty

Design guide

Which high bay is suited to your project?

Use the diagram below to choose your ideal high bay, or for a consultation on your requirements, contact our expert team today.
The designers inside The Studio at Collingwood are able to offer expertise throughout the lighting design process, putting together full schemes based around our comprehensive product range. Detailed client consultation ensures a high quality and tailored service.

Springbok Lite - Open goods storage

Springbok Lite accessories

Make your high bay perfect for your installation

Optional reflectors, refractor and microwave sensor accessories combine excellence and unrivalled cost savings. The reflector and its 80 degrees beam angle will intensify the lighting direction, while the refractor decreases its intensity, softening the glare.

Use the tables below to choose the perfect accessory

	HBL1REFR (for 80W)	HBL2REFR (for 150W)	HBL3REFR (for 200W)	HBLMWS	HBLEMGREM

Low bays

High efficacy & savings

Quick payback

Provide slightly more light, whilst using much less power, resulting in excellent cost savings and quick payback

Energy rate £/kWh: £0.37	Existing fitting	Collingwood fitting
Average lamp life	12,000 hours	50,000 hours
Quality of fittings	100	100
Watts per fitting	400W	150W
Energy £/Year	£129,293	£48,485

Beam angles

Symmetric vs asymmetric

Offering three different beam angles, the Lentus low bay can be used for general lighting or aisles.

120°
general lighting
(circular output)

90°
general lighting
(circular output)

50°x90°
aisle lighting
(rectangular output)

PIR bolt-on sensor

The sensor detects movement and allows the user to set up on/off control or two step-dim parameter.

Up to 6m high

Install as high as 6m high.

Quick attachment

Fast 4 minute conversion time.

Easy attachment

M20 interface for easy installation.

On/Off PIR control & daylight switching

Save energy and money.

Dimming

1-10V

As standard, the Lentus low bays offer 1-10V dimming technology in a single driver, providing flexibility of control.

Easy installation

The low bay has been designed to be as easy as possible to install and maintain.

Lightweight

With its unique and skilful design, the Lentus low bay is extremely lightweight, allowing easy installation and maintenance whilst providing high lumen output.

Aisle spaces

50x90 lens optics provide a rectangular light distribution that is ideal for 3-5m racking aisles.

Compact

Smaller in size, so it can be installed by an individual.

Flicker free

In line with Collingwood values, the best electrical components have been included in the product design. This has resulted in our confidence to assert that the low bays are flicker free fittings.

Having flicker free low bays, results in a more comfortable working environment, and increases employee satisfaction, safety and productivity.

Industrial floodlights

Easy installation

Tool free access

The skilfully designed bracket simplifies the floodlight installation, cutting down costs and time, by allowing tool free access to the fixing screws.

Angle stamped bracket

The floodlights have additional features included such as the mounting angles, which are stamped on the adjustable bracket for precise angles, along with star washers so the bracket can stay in the same position once angled.

1m cable

Installing the K2 floodlights couldn't be easier with a 1m of cable included for ease of installation, in line with Collingwood's demand for high quality, a nickel plated cable gland is included.

Daylight savings

Photocell kit accessory (PCELLKIT)

Outdoor photocell (Dusk to Dawn) sensor kit for use with all outdoor luminaires to keep the lights **off** when it is daylight outside.

Floodlight	Floodlights per photocell
Indy K3 - 65W - 125W	3
Indy K3 - 125W - 200W	2
Indy K3 - 300W	1
K2 - 100W	2
K2 - 150W	2
K2 - 200W	Not compatible

Flicker free

In line with Collingwood values, the best electrical components have been included in the product design. This has resulted in our confidence to assert that the floodlights are flicker free fittings. Having flicker free floodlights, results in better visual comfort, and ensures a crisp image along side CCTV cameras.

Windage factors

Built for the toughest of environments

The windage factor for our range of floodlights are as follows:

- K2 100W (4kg) 1.1m²
- K2 150W (5kg) 1.12m²
- K2 200W (5.6kg) 1.15m²
- K3 65-125W (2.5kg) 1.39m²
- K3 125-200W (4.5kg) 1.09m²
- K3 300W (7.1kg) 0.74m²

Beam angle

Asymmetric

Asymmetric beam angles concentrate light where it is needed by using reflectors to direct light in front of the fixture and minimising light spill.

IP65 & IK08

Built for the toughest of environments

Durable and versatile, the K2 floodlights are IP65 rated and are suitable for outdoors, whether it is for a large warehouse, loading bays, or car parks.

The breather vent maintains the IP65 rating and prevents condensation. This prevents product losing output or product failure.

Wattage switchable

One light, three wattage outputs

Switchable Product enables one luminaire to meet various lux levels within a project using a lumen output switch

Industrial floodlights

- High efficacy up to 156lm/W
- Wattage switchable between 65-125W
- Suitable for use in coastal applications

Ground light

GL019

Discreet yet powerful, our IP68 rated ground lights are perfect for outdoor and indoor use. Available in ultra-low glare through to frosted. Their small size makes them perfect for accent lighting.

Spike light

SL220

Stylish and versatile. With a 90° vertical and horizontal tilt, spike lights bring outdoor features and spaces to life. Available in four colour finishes, IP65 rated, these low energy lights can be adjusted as your garden grows.

Marker light

GL100 & GL200

Perfect for paths and steps, these domed lights are constructed of marine grade stainless steel or brass and comes with a 7-year warranty.

Hooded light

GL019 Eyelid

For steps, wall or ground lighting, hooded design directs light across the surface whilst reducing glare and eliminating upward light spill. Available in stainless steel and black finishes.

Rotatable spot

UL030 & UL010

A stylish swivel mounted outdoor light. Engineered to last with a 70,000hr life span and IP68 rated, this fully submersible light is the ideal way to bring your pond, swimming pool or landscape to life.

LED line

Volta wall washer

Ideal for highlighting architectural features, our LED line washes the facade of your property with light, whilst minimising light spill.

1901

Design your light
Configure your solution in seconds

Over a century of design, expertise and innovation in lighting. The 1901 collection is elegantly understated, and yet infinitely customisable. Emitting an unparalleled quality of light, these LED luminaires add radiance to a room, whilst enhancing the purity of the natural colours.

Each downlight, spot light and pendant are custom built and hand finished to your specification. This design versatility, creates a limitless collection to complement each space. A uniform and stylish look, with layers of light that flow seamlessly throughout a room, or the entire property.

Your lighting scheme, your way, without compromise.
