Light **Your** Moment

We believe in helping
people light their
moments sustainably

by continuously pushing the boundaries of LED lighting technology. We design our products with people's experience at heart, to enhance everyday life, and build a better future. Every occasion matters, we don't make lights, we make moments.

An aerial photograph of a vast, dense forest of evergreen trees, likely spruce or fir, covering a hillside. The trees are tightly packed, creating a textured green surface. A semi-transparent teal and blue gradient overlay is positioned on the left side of the image, containing white text.

**We aim to
be carbon
neutral by
2030**

Light a better future

Sustainability is at the core of everything we do

When we partner with you to create amazing projects, we work hard to do so responsibly. Our commitment to tackle environmental challenges means we are pro-actively taking action to minimise the impact of our materials used and operations, to build towards carbon neutrality.

Bronze medal EcoVadis

Methodology built on international sustainability standards. EcoVadis is the world's largest and most trusted provider to rate our business and provide you with transparency about our environmental, social and ethical performance - or sustainability. We are pleased to share that our sustainability efforts this past year has increased our score from 60 to 63, earning EcoVadis bronze medal. Placing us in the top 19%

Recycling

- 100% of our cardboard waste is either used as shredded packaging filler or recycled.
- 100% of our plastic waste is used in bales or recycled.
- 100% of our warehouse pallets are recycled.

Energy from renewable sources

100% of our electricity comes from renewable energy sources such as solar and wind turbines.

Waste experts partnership

We partner with waste experts to enhance our overall environmental performance.

- 100% of our waste is diverted from landfill.
- 96% of our waste is recycled, with the remaining 4% being recovered as energy from waste.
- Consolidating waste pick ups to minimise our carbon footprint.
- Euro 6 standard for all our waste pick up vehicles.

Greener packaging

Reduce, re-use & recycle

Apart from products, businesses produce more packaging than anything else, we know how important it is to do everything we can to minimise the impact it has on the environment.

100% recyclable

- Our boxes are made entirely from card to make them easy to recycle.
- We use no plastics to make our boxes (including the finish of the box).
- We use vegetable oil inks to ensure they are recyclable.

FSC approved card

We use card from FSC approved forests in our boxes. This means that the card used to make the box comes from a replenishable forest and for every tree used another one is planted.

Less wastage

We make sure that we design our boxes to use as little material as possible to minimise their carbon footprint.

Less ink

Our new brown box design uses significantly less ink than a full colour box with images. When producing the packaging this makes the carbon footprint much smaller.

Light is an experience

There's lighting, and then there's lighting

Filling a room with light is easy, but bringing a space to life with light takes expertise. We thrive on making the most of spaces and taking your projects to the next level with our lighting design studio.

the studio

Our in-house lighting design team with over 50 years of experience can create amazing bespoke lighting designs for your project. Your project, your vision, partnering with Collingwood to create amazing projects together.

- Customised designs built specifically for your needs.
- From single room to entire building projects.
- Quick, efficient and on budget service.
- Compliant lighting solutions.
- Value engineer service.
- We use Dialux and Relux to make sure we have the most effective software possible.
- We provide a full quote and solution.

Atmosphere with colour

Choosing the ideal CCT is essential to creating the perfect atmosphere for your project.

Warmest
2700K

Warm
3000K

Natural white
4000K

Wood / Sand
2700K

Stone
3000K

Whites
4000K

Maximising materials with colour

Bring the best out of the materials in your project by using the ideal CCT (Correlated Colour Temperature).

Layering light for interiors

Combining key elements of ambient, accent and task lighting, will create a sophisticated multi-layered lighting scheme to bring any space to life.

① Ambient lighting

The primary source of light in a space providing general background illumination.

② Accent lighting

Provides points of focus and highlights areas of the space to add depth.

③ Task lighting

Lights areas for specific tasks to take place in the space.

Layering light for exteriors

Combining functional, feature and social lighting will make the most of an exterior space whilst adding depth to the lighting scheme.

④ Functional lighting

Lights areas for specific tasks to take place in the space.

⑤ Feature lighting

Provides points of focus and highlights elements of the space to add depth.

⑥ Social lighting

Creates ambience and a space that people will spend most of their time in.

Layering light

While this room is well illuminated using only downlights, you could make it more impressive.

By using adjustable downlights we can highlight the artwork on the walls.

By adding strip lighting to the shelves we add a focus point that acts as an additional feature in the room.

By adding more strip around the central area of the ceiling, we get extra illumination and another point of interest in the room.

With multiple points of interest in a room, we have created depth to the lighting scheme and brought the room to life.

Lighting makes up

Controlled lighting

Save energy, save money

Rising energy costs, inefficient technologies, and the need to act more sustainably, demands that we all address this energy consumption. Investing in the latest lighting technology along with professional lighting design, can reduce energy consumption by up to 82%.

The right amount of light

During the development process, we pay careful attention to understand what application the product is being designed for and how much light is needed. Then by tuning the luminaire to these requirements, we are sure to avoid overlighting of a space and maximum efficiency.

Light ON only when needed

The most efficient light fitting is the one that is switched **off**. Making the switch to both energy efficient luminaires and controls will help you save money. Our control system requires no special wiring or approach by the installer and you can decide on the set up once the installation is complete, making it easy to implement on your next project.

Expert lighting design

Too often lighting refurbishments are carried out without considering how the people are using the space and what tasks they are performing. Through this understanding, we are able to optimise your energy savings by considering the zoning of your lighting layout and ensuring light is directed to where it is really needed and with the correct intensity.

Energy saving strategy

In all building types, it is common to find a mixture of different types of lighting, sometimes different technologies and a mix of efficiency. We partner with our customers to help you identify the low hanging fruit so that together, we can form a short, mid and long term strategy to save you energy.

We test all

No substitute for quality

You can be confident with us

Your piece of mind and confidence in our products is important to us. Since we were established in 1901 we have been driven to deliver nothing but the highest quality in everything we do. We offer longer warranties and get third party accreditation to ensure you can trust our products.

LIA accreditation

The Lighting Industry Association Quality Assurance scheme is developed by industry experts. The scheme assesses the members quality system and product compliance, and supports the member in achieving and maintaining the standard expected for LIA membership. Collingwood has been awarded the LIAQA Assured Company mark.

EDA accreditation

The EDA (Electrical Distributors' Association) is the trade association that represents the interests of wholesale distributors of electro-technical products in the UK. Collingwood is a product affiliate and together we work for the good of the sector.

Long product warranties

You can trust our products. We offer long warranties on our products because we believe in them. They all go through vigorous testing to ensure they are of the highest quality that will stand the test of time.

Two year on site warranty

With the majority of our commercial products we offer a two year on site warranty.

Warranty registration

Complete our online form within 90 days of installing to ensure you receive your free extended warranty.

A history of innovation

Founded in 1901

We started our journey of designing innovative LED lighting products in 2002. Over the years we have produced a number of products that were the first of their kind in the UK market. It's this pioneering spirit that drives us to continue to push the boundaries of LED technology to enhance people's lives.

First in the market to manufacture lumen and colour switchable residential downlights

Two lumen outputs and three colour temperatures, all within one single luminaire.

First to produce 100% waterproof

Sealed for life, 100% waterproof, inground LED lighting products.

First to design & manufacture

LED lighting products for the UK electrical wholesale market

First outdoor LED products

Produce sealed for life outdoor LED lighting products.

First for fire rated downlights

First to produce a fit for purpose, high performance, fire-rated LED downlight.

First to comply with building regulations

First to produce an LED downlight that complies with all building regulations.

First to offer extended warranty

First to offer a 10 year warranty. We now offer a 3, 4, 5, 7 & 10 year extended warranty.

First to produce mains dimmable

Mains dimmable LED downlights.

First to create a 360° downlight

Produce a fire, acoustic and moisture-rated 360° spherical style downlight.

Fast reliable service

We're here to help you succeed

We believe you have the ability to create amazing projects and we want to help you achieve it. We pride ourselves on always being readily available to provide a level of service that gets you what you need to excel and achieve unbelievable things.

**Place an order
before 3pm**

**Free next day direct
to site delivery**

Technical support team

We pride ourselves on always being readily available to provide a level of service that gets you what you need to excel and achieve amazing things. With expert knowledge of electrical installations, our technical support team can provide a solution either over the phone or on site.

Free on site support

On large scale projects a member of our technical support team will go to your site to help plan your installation to ensure it runs smoothly.

Our technical support team are also on hand if you are experiencing any difficulties to help you get the most from your Collingwood installation.

Free on the phone support

Readily available and with expert knowledge of our product portfolio our technical support team are on hand to answer any question you have about our products.

Online support

To ensure you get the support you need 24 hours a day, we offer online support.

- Detailed product information on our website.
- Email updates to keep you informed.
- Literature available on our website.
- Product configurators to help you make the right choice easily.

Amazing spaces

**Your vision, your way,
created together**

We believe you have the ability to create amazing projects and we want to help you achieve it. Creating environments that put people's experience first and enhance everyday life are fundamental to our approach at Collingwood. Let's create an amazing space together.

Residential

Lighting has the ability to transform a house into a home. Create a striking balance of layering light that blends seamlessly together. Consider use of dimmers as they allow for flexibility depending on the time of day, event or mood you want to create, whilst also acting as a great way to reduce energy consumption.

Here at Collingwood, we understand the need to create warm and inviting spaces, which is why we have a range of colour temperatures to choose from to create the right atmosphere for the room.

Residential downlights

Easy installation and built to last

Built to last with high quality components and innovative features, ensuring longevity and easy installation.

Easy-fit connector

Quick & easy installation

Our patented Easy-fit connector supplied with H2/H4 Lite designed to minimise installation time and ensures fitting the product is as easy as possible. The 2-part push-fit connector makes wiring to the mains a less time-consuming process. The light can also be easily attached and replaced by anyone.

- No tools required for installation (when already attached to product)
- Piano key connector for ease of installation
- First-fix compatible
- Retro-fit compatible
- Less risk of damaging fittings and ceiling during installation
- Loop-in loop-out
- 16A rated

H2 Lite, H2 Pro Extreme CSP and H4 Lite

Upgradeable, Re-useable, lights that lasts

With approximately 5 million units supplied to a wide range of customers, H2 Lite, H4 Lite and H2 Pro Extreme have a proven history of excellent performance, fast installation, and lifetime you can trust.

Our next generation design builds on this further to offer the below new feature and benefits:

- Optimised design with no waste, minimizing the use of materials and impact on the planet.
- FSC certificated packaging ensure minimal waste.
- NEW unique interchangeable design which allows the driver to easily be replaced should it fail.

Backed by an industry leading warranties and should you have an issue, replacement drivers are stocked in the UK for quick after sales support.

Colour Switchable Product

One light, three or four colour temperatures

Always have the correct product on hand. Our range of colour switchable downlights are available to stock in 3 or 4 colour temperatures in 1 product (2200K, 2700K, 3000K & 4000K).

Advantages

- Simpler product range.
- Products can be adjusted after they are installed.

2200K

2700K

3000K

4000K

Use the CCT switch to choose the ideal colour for your installation.

CRI

High colour rendering is available on the downlight range. 90CRI chips are close to natural sunlight and bring out the true representation of colours under artificial light.

90+Ra

80Ra

Insulation coverable

Install the product directly under insulation

Many of our downlights are insulation coverable, suitable for both rolled and blown installation.

Advantages

- Quick & easy to install.
- No need to buy insulation protectors.

Beam angles

Products with a wide beam angle cover a wider area with fewer lights, reducing time and cost spent on fittings. Alternatively, products with a narrow beam angle have a great light intensity and are perfect for smaller spaces.

Adjustable fittings

Collingwood's adjustable range provides a versatility that is perfect for vaulted ceilings, standard ceilings and for highlighting features and artwork on walls.

I-Joist and Metal web approved

Built for Residential installations

Our downlights have undergone vigorous testing to ensure they are perfect for use with I-Joists, metal web and solid timber ceiling types.

Vigorously tested to ensure fit-for-purpose products

Collingwood were the first company to produce a fit-for-purpose, high performance, fire-rated downlight that enabled compliance to Part B of the building regulations. In the period since, we have supplied millions of downlights worldwide.

What is a timber I-Joist?

These are purposely engineered to be light and strong, whilst removing the imperfections which can come from natural timbers. The name comes from the shape. There is a top and bottom flange element with the web in between. Their common application is within residential floors, roofs and are becoming increasingly popular with their benefits over solid timber joists. Such benefits include the ease of handling due to their light weight, less prone to warping and ease of drilling to install services such as pipes and cables.

What is a metal web joist

A metal web joist is a combination of timber chords and pressed metal webs, which form an open web joist. The open web allows for installations of services like pipes and cables to pass through the metal webs without the need for cutting holes within the joist. The open web structure means they are lighter to handle than solid timber joists, and allows for greater load bearing areas with the open web design, making it simple to install pipes cables etc.

Cut-out size guide

For your downlights

Use the guide below to determine the recommended cut-out size for each Collingwood downlight. For retro-fitting varied sizes, view our converter plate range on **page 62**.

Wiring information

Cable / flying lead	0.75mm² - 2.5mm² 3 core cable for connector
Cable required for connector	Push-fit terminal for: Twin & Earth (6242Y 2x1.5mm²) or 3-core cable (R02V 3x1.5mm²)
Type of wiring required	Parallel

Accessories

DM298GRID	LED mains grid dimmer	Sold Separately
DM298FP	Faceplate dimmer	Sold Separately
LEDEP10EM	Manual-test emergency converter	Sold Separately
LEDEP10	Self-test emergency converter	Sold Separately

Residential Downlights

Designed for family living spaces to suit architectural decor

True low glare
UGR19 as opposed to perceived low glare

Wattage Switch
enables range from 550 up to 1000 lumens

H2 Deco CSP Black

Wattage & CCT Switchable Architectural Downlight

Features

IP rating	IP65 (from below) IP20 (from above)
CSP switchable	Switchable CCT
Tilttable	No
UGR	16
Dimmable option	Yes (Mains)
Input	220-240V 50/60Hz
LED lifetime	44,000h L70 B10
CRI	80 Ra
SDCM	3 SDCM
Emergency option	Yes, using converter

Installation information

Install connector type	Loop in / Loop out
Insulation coverable	Rolled and blown insulation
Cut out size	68mm - 75mm
Bathroom zone	1
Inrush current	5A 150us
Construction material	Mild steel / PC
Maximum ceiling thickness	40 mm
Weight	300g

Residential Downlights

IP65 from above and below for total protection

Suitable for use in coastal applications

New 2200K to minimise effects of blue light

Guarantee

4 years

Features & benefits

Use 2700K to illuminate materials such as wooden fences, sand or red brick to highlight warm tones

Select 2200K to minimise the effects blue light content has on nocturnal animals to help survival and growth rates

Collingwood Switchable Product

TRIAC mains dimmable suitable for leading and trailing edge dimmers

Bezel integrated to product

Pair with dusk to dawn sensor PCELL kit to bring on when dark and off when light

Beam angle: 40°

H2 Pro Extreme CSP

IP65 (above+below) downlight suitable for installing outdoor in building soffits and canopies

Features

IP rating	IP65 (from below and above)
CSP switchable	Switchable CCT
Tiltable	No
UGR	22
Dimmable option	Yes (Mains)
Input	220-240V 50/60Hz
LED lifetime	40,000h L70
CRI	80 Ra
SDCM	4 SDCM
Emergency option	No

Installation information

Install connector type	Flying lead
Insulation coverable	No
Cut out size	Ø 65-75mm
Bathroom zone	1 (ceiling only)
Inrush current	2.3A 0.06ms
Construction material	Aluminium / Plastic
Maximum ceiling thickness	30 mm
Weight	148g
Maximum ambient temperature	-20° to +40°
SELV	Yes
Building regulations	Part C, P & L
Ceiling joist approvals	No
Electric class (1, 2, 3)	2

Photometrics @ 25°C

DM298GRID

250W LED mains grid dimmer

Product Code

Product code	Description
DM298GRID	250W LED mains grid dimmer

Installation information

Guarantee	1 year guarantee
Construction material	Plastic
Dimmer type	Push on / off, rotary dial dim
Grid plate adapters	White adaptors for Hamilton, MK, BG, Crabtree, Schneider, DETA, Hager & Wandsworth grid ranges
Mains supply voltage	220-240V 50/60Hz
Load type	LED dimmable driver only
Load capacity	5W - 250W / 15 LED Units Max.
Phase firing	Trailing edge dimming
Connection terminals	3mm ² Max
Back box depth	35mm min
Surface temperature	40°C

Use with

Compatible with all Collingwood dimmable products

DM298FP

100W LED 2 way push on/ off rotary dimmer

Architectural lighting

Design your light, configure your solution in seconds

Highlight the beauty of interior spaces with the 1901 range of high quality lighting products. Designed and made in Great Britain, the 1901 range embodies over a century of innovative engineering, research and development.

1901 Range

The 1901 range has nine configurable elements which combine to form your bespoke light fitting. Our product code matrix makes selection simple. The available choices start with the bezel colour, and move through all elements of the product, including the beam angle, IP rating, colour temperature dimming method and more.

Fixed downlight

Adjustable downlight

Pendant

Rotatable spot

Building your 1901 product code

Choosing the ideal 1901 fitting

Using the matrix below, working from left to right build your product code.

1 Product type

The 1901 range is elegant in its simplicity; a downlight with a slim and discreet flat metal bezel, an elongated and slender pendant tube, and a neat and compact rotatable spot

BD - Baffled downlight

A classic downlight which can be fixed or adjustable. A great choice for general illumination of any space.

BP - Baffled pendant

The suspension height of the surface mounted pendant can be adjusted by altering the length of the fabric-covered cable on site. It is also mains dimmable as standard, making it perfect for highlighting kitchen islands or dining tables.

BS - Baffled rotatable spot

A great choice for flexible illumination of focal points, such as artwork or architectural details, creating contrast and drama. Also comes with a choice of a recessed or surface mounted base plate and a range of dimmable driver options

2 Housing / Trim colour

All products in the 1901 range are available in matt black or matt white finish

B - Matt black

A great choice to make the product appear invisible on a dark surface, or create contrasting drama against a light surface.

L - Matt white

Our most popular finish is simply discreet and stylish.

C - Matt white with black cable

3 Baffle colour

With a stylish and sleek design our choice of baffles will create beautifully lit interior spaces.

0 - Matt white baffle

All our downlights, pendants and rotatable spots are available with a matt white baffle for a discreet look.

1 - Matt black baffle

All our downlights, pendants and rotatable spots are available with a matt black baffle for low glare.

Downlight options

Showcasing an aesthetically simple, low-glare luminaire design with superior performance. Choose from round, slim round, square, single trimless or double trimless downlight styles to perfectly illuminate residential and hospitality spaces.

0 - Slim round bezel

Available in fixed only
Cut out size Ø65-68mm

Adjustable cut out size Ø76-78mm

Mounting options for pendants and rotatable spots

5 - Semi recessed

The remote driver and base plate with springs makes this option ideal for mounting on ceilings and walls with a void space.

Single and double trimless versions are plastered in place for the ultimate discreet and stylish finish.

3 - Single trimless

Cut out size Ø68-86mm

4 - Double trimless

Cut out size 2 x Ø68-86mm

6 - Surface mounted

The mains dimmable driver is integrated into the base, which is ideal when there is limited void space.

5

Fixed / Adjustable

The functional fittings are available in fixed or adjustable options.

F - Fixed

Fixed downward position achieves a broad spread of ambient light throughout a space.

A - Adjustable

Light can be directed to where it is required, such as highlighting features and artwork on walls.

6

Colour temperature (CCT)

Creating the ambience and mood of a room is hugely dependant on the chosen lighting. Our selection of colour temperatures result in a comfortable yet high impact lit effect which luxuriously enhances interiors and architectural features.

2700K

Create an inviting, warm ambience, ideal for living rooms and bedrooms where you want to promote relaxation.

3000K

This is a moderately warm white light which is ideal for general use in residential projects.

4000K

This is a brighter white light so is an excellent choice for home offices and gyms.

Dim to Warm

Mimic traditional light sources by creating a progressively warmer light as you dim the fitting. 3000K at 100% brightness is perfect for everyday use, or dim all the way through to 1800K at 10% brightness for a really cosy and intimate environment.

7 Beam angle

Wide, medium and narrow beam options can be selected, which can achieve the desired effect for the size of space.

N - Narrow 12°

The narrow beam option has a greater intensity, making it ideal for highlighting features. (Not available in Dim to warm)

M - Medium 24°

Medium beam option has more a wider spread of light, and is a good choice for corridors.

W - Wide 45° or 50°

Wide beam angle is a good choice for creating an even spread of light across a wide open area.

8 Dimming options

Choose from a choice of drivers to suit any control preferences.

M - Mains driver

A mains driver is suited for dimming via a mains circuit and dimmer switch. Comes with the Collingwood Easy-fit connector to speed-up the installation process.

D - DALI-2 driver

Commission a DALI-2 system to control individual 1901 fittings, or groups of fittings, with the smooth and simple operation as expected from this digital protocol.

V - 1-10V driver

The choice for dimming via an analogue 1-10V control system. Up to 10 drivers can be linked to one dimmer.

9 IP rating

Three IP ratings are available depending on preference.

IP20

The lowest IP rating of the range is perfect for almost all indoor spaces, such as living rooms, dining rooms and hallways.

IP44

A great choice where they may be a potential exposure to water spray, such as kitchens.

IP65

Where there is a high probability of water spray and airborne moisture, choose IP65. Great for bathrooms.

Make your 1901 product fire-rated

If you require a fire-rating from your 1901 recessed pendant or rotatable spot, you will need a fire hood.

Simply push the fire-rated hood into the void through the cut-out hole, and insert the fitting into place beneath it. A quick and easy way to fire-rate your 1901 recessed pendant & rotatable spot product.

Product code: BDLFH2

Technical information

Use the table below to work out the photometric data for your 1901 product.

LED LYTE 6 WAY EXT	6-way 1m Plug & Play extension lead	Sold Separately
PDC/GRID DIMMER	Grid dimmer kit for multiple fitting types	Sold Separately

Beam angle: 110°

LED LYTE IP T

IP rated threaded mini LED light

Features

IP rating	IP65
CSP switchable	Single CCT
Tilttable	No
Rotatable	No
Dimmable option	Driver dependent
Input	350mA
LED lifetime	70,000h L70
CRI	80 Ra
SDCM	3 SDCM

Installation information

Cut out size	Ø 26mm
Bathroom zone	1
Inrush current	N/A
Construction material	Anodised aluminium
Weight	44g
Maximum ambient temperature	35°C
Electric class (1, 2, 3)	3

Photometrics @ 25°C

Product code	Finish	W	CCT	∠°	lm	lm/W	Energy
LED LYTE IPT NW	Silver	1W	4000K	110°	82	82	

Wiring information

Cable / flying lead	1m (0.205mm² red & black PTFE)
Type of wiring required	Series

Recommended LED drivers

See pages 208-213 for complete LED driver offer

Product code	Input	SELV	Dimming	Bathroom zone	Products per driver

Step Lights

2.6W

Coastal protected

Main voltage step light

Guarantee

7 years

Features & benefits

Recessed, asymmetric wall or ground light perfect for illuminating walls, steps and pathways

Available in rustic cast stainless steel and sleek brushed stainless steel finishes

Installation tube included

WL339

Asymmetric, straight to mains, cast finish step light

Features

IK rating	N/A
IP rating	IP65
CSP switchable	Single CCT
Walk over / Drive over	Walk over
Input	220-240V 50/60Hz
LED lifetime	70,000h L70
CRI	80 Ra
SDCM	3 SDCM

Installation information

Cut out size	Ø 80mm
Bathroom zone	2
Inrush current	9A 0.8ms
Construction material	Stainless steel (316)
Suitable for coastal areas	Yes
Weight	1000g
Maximum ambient temperature	35°C
SELV	Yes
Electric class (1, 2, 3)	1
Earth leakage	0.1mA

Photometrics @ 25°C

Product code	Finish	W	CCT	Beam angle	lm	lm/W	Energy
WL339WW	Stainless steel	2.6W	3000K	50°	50	19	A++

Wiring information

Cable / flying lead	1m (H05RN-F) rubberised cable (outside diameter: 7mm)
Type of wiring required	Parallel

Accessories

Installation Tube	For easy ground installation	Included
JB5	Gel filled waterproof connector	Sold Separately
WC 5-9	Quick release waterproof joint	Sold Separately

Plane: 50° C0/C180 50° C90/C270

Ø98mm

WL340

Asymmetric, straight to mains, step light

Features

IK rating	N/A
IP rating	IP65
CSP switchable	Single CCT
Walk over / Drive over	Walk over
Input	220-240V 50/60Hz
LED lifetime	70,000h L70
CRI	80 Ra
SDCM	3 SDCM

Installation information

Cut out size	Ø 80mm
Bathroom zone	2
Inrush current	9A 0.8ms
Construction material	Antique Brass
Suitable for coastal areas	Yes
Weight	1100g
Maximum ambient temperature	35°C
SELV	Yes
Electric class (1, 2, 3)	1
Earth leakage	0.1mA

Photometrics @ 25°C

Product code	Finish	W	CCT	∠°	lm	lm/W	Energy

Ground Lights

1W at 350mA or 700mA

Honeycomb baffle for low glare and visual comfort

Low voltage ground light

Guarantee

7 years

Features & benefits

Compact yet powerful fitting
Shallow depth for easy installation
Robust cable for outdoor use
Marine-grade stainless steel 316

Beam angle: 12° 30°

Ground Lights

1W at 350mA or
700mA

Frosted effect for
low glare and soft
lighting

Low voltage ground
light

Guarantee

7 years

Features & benefits

Robust cable for outdoor use

Shallow depth for easy installation

Black anodised aluminium

GL019 Frosted

1W, 13lm frosted mini ground light

Features

IK rating	IK07
IP rating	IP68
CSP switchable	Single CCT
Walk over / Drive over	Walk over
Input	350mA / 700mA
LED lifetime	70,000h L70

Ground Lights

0.5W 0.5W at 24V DC

Frosted effect for low glare and soft lighting

DC Low voltage ground light

Guarantee

3 year extended warranty (see "NEW" codes which now have a 7 year extended warranty)

Features & benefits

Square bezel for a different decorative effect

Robust cable for outdoor use

Shallow depth for easy installation

Easy and quick installation with parallel wiring

GL018 SQ

0.5W, 3lm square mini marker ground light

Features

IK rating	IK07
IP rating	IP68
CSP switchable	Single CCT
Walk over / Drive over	Walk over
Input	24V DC
LED lifetime	30,000h L70
CRI	80 Ra
SDCM	3 SDCM

Installation information

Cut out size	Ø 28mm
Bathroom zone	0
Inrush current	N/A
Construction material	Stainless steel (316)
Suitable for coastal areas	Yes
Weight	300g
Maximum ambient temperature	35°C
SELV	N/A
Electric class (1, 2, 3)	3
Earth leakage	N/A

Photometrics @ 25°C

Strip lights

Flexible or rigid, Collingwood Lighting's wide offering of LED strip lights are a time efficient way of creating stunning results in almost any environment. We offer a bespoke cutting service on both the essential and premium range. As well as the bespoke cutting service, we offer a comprehensive range of accessories designed to ensure that installing these products is quick and easy. Choose from a range of styles and LED colours to emphasise signs, stairs and walls. Collingwood's LED products contain output control technology, ensuring that

all LEDs in the strip receive the same current are the same colour temperature and CRI throughout the entire length. Including IP rated strips in the product portfolio allows the option to install both in and outdoors, with very little maintenance required over time. Combined with the appropriate connectors, the need for unsightly wiring on display is eliminated, allowing the product to be displayed around sharp corners, resulting in a high-quality finish for any installation.

Comparing strip types

Choosing between standard, premium, COF & neon

Our extensive range of decorative and under shelf lighting has a multitude of attractive options which are suitable for any installation.

Flexible tape - Constant voltage

Options for indoor use.
Flexible tape for runs up to 5m.

Flexible tape - Current regulated

CRI 90 LED chips allow a high quality option for indoor and outdoor use.
Flexible tape for runs up to 20m.

Dotless strip

COF LED strip is ideal for creating long linear light patterns in indoor applications. In contrast to other types of LED strip, this “chip on flex” design creates a pure dotless appearance, where the individual chips are not visible. Flexible tape for runs up to 5m.

Neon strip

Neon strip provides low glare with a soft and uniform light, ideal for indoor and outdoor use. Flexible profile for bending in the wall.

Choosing LED strip

Find the ideal strip for your installation

Take into consideration the below questions when choosing your LED strip.

What effect strip do you need?

Strip type

Flexible tape

Ideal for when your strip will not be visible after installation.

Dottless flexible tape

Ideal for when your strip may be visible after installation.

Neon bending

Ideal for creating shapes and curves in your installation.

Where are you using your LED strip?

IP rating

IP20 dry environments

For spaces such as living rooms and other living spaces.

IP44 damp environments

For indoor spaces such as kitchens, or bathrooms.

IP67 outdoor environments

For outdoor spaces such as gardens, façades, and under water.

Primary or accent lighting?

Wattage

4.8W accent lighting

Ideal for lighting under cabinets and kickboards.

9.6W atmospheric lighting

Ideal for lighting in coves to create atmosphere.

14.4W/17W primary lighting

Ideal for lighting up a room using coves or exposed beams.

Warm or cool atmosphere?

CCT

2700K warmest

For a warm and intimate feel, use 2700K.

3000K warm

For the warmth of a halogen, use 3000K.

4000K neutral white

To replicate the look of daylight, use 2700K.

What length strip do you need?

Length

Up to 5m lengths

Constant voltage strip is ideal for lengths under 5m.

Over 5m lengths

Current regulated strip is ideal for lengths between 5m and 20m.

Will you need an accessories?

Accessories

Profile

Diffuse your light and create a stylish finish with profile.

Connectors

Connectors can be used to extend your strip and go around corners.

Drivers

The driver will depend on the wattage and length of the strip.

Choosing LED strip

Find the ideal LED strip for your installation

Use the tables below to find the ideal LED strip for your installation.

Flexible tape

(Current regulated - Up to 20m lengths)

Current regulated technology to ensure there is no loss in light output, regardless of how long the strip is or how far away the driver is.

Choosing Dotless & Neon strip

Find the ideal LED strip for your installation

Most LED strip will have visible dots of light where the chips are, but our dotless and neon strip shows a clean smooth line of light for a premium look.

Dotless (COF)

Flexible and adaptable. Ideal for various applications.

IP rating	Wattage	Colour temperature	Length	Product code
IP20	8W/m	2700K	5m	LSFA27050
		3000K	5m	LSFA30050
		4000K	5m	LSFA40050

Dotless (LSP)

Flexible and adaptable. Ideal for various applications.

IP rating	Wattage	Colour temperature	Length	Product code
IP20	14W/m	2700K	5m	LSP195027
		3000K	5m	LSP205030
		4000K	5m	LSP225040

Neon (side bending)

Ideal for flat surfaces with a curved line of light.

Bend direction	IP rating	Wattage	Colour temperature	Length	Product code
Side	IP67	6.5W/m	2700K	3m	LSNS7327030
				5m	LSNS7327050

Choosing profile for LED strip

Find the ideal profile for your installation

We recommend housing your LED strip in a profile to provide a clean, flat surface and professional finish.

Recessed profile

Ideal for recessing into walled material to blend seamlessly and create flat surfaces.

RP7

7mm deep recessed anodised aluminium profile and translucent diffuser (not compatible with IP68 LED Strip)

Product code	2m: RP7020
Construction material	Anodised aluminium & plastic diffuser
Guarantee	1 year

Accessories (supplied with profile)	
RP7ECA / RP7ECB End cap	

RP28

28mm deep recessed anodised aluminium profile and translucent diffuser

Product code	1m: RP28010 2m: RP28020
Construction material	Anodised aluminium & plastic diffuser
Guarantee	1 year

Accessories (supplied with profile)	
End cap	

Surface-mount

Perfect for use in ceiling voids, shelves and under cabinets to create a clean and effective installation.

SM7

7mm slim surface-mount anodised aluminium profile and translucent diffuser (not compatible with IP68 LED Strip)

Product code	1m: SM7010 2m: SM7020
Construction material	Anodised aluminium & plastic diffuser
Guarantee	1 year

Accessories (supplied with profile)		Accessories (sold separately)
RP7ECA / RP7ECB End cap	SM7MA Mounting bracket	SM7LC Linear connector

SM28

28mm deep surface-mount anodised aluminium profile and translucent diffuser

Product code	1m: SM28010 2m: SM28020
Construction material	Anodised aluminium & plastic diffuser
Guarantee	1 year

Accessories (supplied with profile)	
SM28ECA End cap	SM28MB Mounting bracket

7mm deep profile

A thinner, recessed profile will fit into thinner materials. Using a slimmer, surface-mount profile allows for a more discreet output when surface mounted.

28mm deep profile

Using a deeper profile will result in a diffused light, creating a softer ambiance.

Plaster in profile

These are perfect for plastered surfaces, fix in place before the plastering has been done, leaving a seamless flat surface.

LSPLA21314

2m, 10mm deep Plaster in profile & opal diffuser for LSP strip

Product code	LSPLA21314
Construction material	Anodised aluminium & plastic diffuser
Guarantee	1 year

Accessories (supplied with profile)

4 x End caps

Surface-mount corner profile

Ideal for installing into a 90° corner, which is ideal for use under shelving and cabinets for a seamless installation.

CO7

45° slim surface-mount corner anodised aluminium profile and translucent diffuser (not compatible with IP68 LED Strip)

Product code	1m: CO7010 2m: CO7020
Construction material	Anodised aluminium & plastic diffuser
Guarantee	1 year

Accessories (sold separately)

CO7ECA / CO7ECB
End cap

CO7MB
Mounting bracket

LED cove packs

Cove packs are a great way to illuminate a room by reflecting light off of a ceiling.

Product code	LED COVE PACK
Construction material	Plastic
Guarantee	1 year

Accessories (supplied with profile)

LED cove clip
Fixing clip

Why choose a cove pack?

Using a cove pack helps to create a sleek and contemporary finish when directing light from LED strip on to the ceiling. Creates a striking wash of light up the wall as well as light hitting the ceiling.

This paintable, plastic coving is a complete housing for the quickest installation of an illuminated LED coving. An upper channel holds a flexible lighting strip and a lower, concealed channel directs all the cabling. Available in 1m lengths.

Profile for neon side bending strip

Find the perfect profile for your neon strip

Use a profile to mount your neon strip to a surface.

Fixed straight

Ideal for surface mounting and creating straight lines

LSNS1217PPC

Side bending Neon strip polycarbonate profile

Product code	1m: LSNS1217PPC
Construction material	Polycarbonate
Dimensions	15 x 19 x 1000mm
Guarantee	3 year

LSNS1217PAL

Side bend Neon strip aluminum profile, with cove for cable underneath the strip

Product code	1m: LSNS1217PAL
Construction material	Aluminium
Dimensions	15 x 25 x 1000mm
Guarantee	3 year

Side bending

Ideal for surface mounting and creating curved shapes

LSNS1217PFL

Side bending Neon strip flexible profile

Product code	0.5m: LSNS1217PFL
Construction material	Aluminium
Dimensions	28 x 12 x 500mm
Guarantee	3 year

Clips

All purpose surface mounting clips

LSNS1217MPC

Side bending Neon strip polycarbonate clip
Install every 33cm

Product code	1m: LSNS1217PPC
Construction material	Polycarbonate
Dimensions	15 x 19 x 1000mm
Guarantee	3 year

LSNS1217MAL

Side bending Neon strip aluminum clip, with cove for cable underneath strip
Install every 33cm

Product code	1m: LSNS1217PPC
Construction material	Polycarbonate
Dimensions	15 x 19 x 1000mm
Guarantee	3 year

Profile for neon top bending strip

Find the perfect profile for your neon strip

Use a profile to mount your neon strip to a surface.

Fixed straight

Ideal for surface mounting and creating straight lines

LSNT1312PPC

Top bending Neon strip polycarbonate profile

Product code	1m: LSNT1312PPC
Construction material	Polycarbonate
Dimensions	15 x 15 x 1000mm
Guarantee	3 years

LSNT1312PAL

Top bend Neon strip aluminum profile, with cove for cable underneath the strip

Product code	1m: LSNT1312PAL
Construction material	Aluminium
Dimensions	15 x 19 x 1000mm
Guarantee	3 year

Top bending

Ideal for surface mounting and creating curved shapes

LSNT1312PFL

Top bending Neon strip flexible profile

Product code	50cm: LSNT1312PFL
Construction material	Aluminium
Dimensions	14 x 14 x 500mm
Guarantee	3 year

Clips

All purpose surface mounting clips

LSNT1312MPC

Top bending Neon strip polycarbonate clip
Install every 33cm

Product code	1m: LSNT1312MPC
Construction material	Polycarbonate
Dimensions	15 x 15 x 25mm
Guarantee	3 year

LSNT1312MAL

Top bending Neon strip aluminum clip, with cove for cable underneath strip
Install every 33cm

Product code	1m: LSNT1312MAL
Construction material	Aluminium
Dimensions	15 x 19 x 25mm
Guarantee	3 year

Choosing LED strip connectors

Find the ideal connectors for your strip

Use the matrix to find the perfect connectors for your LED strip

Strip to strip

Strip to strip connectors connect one end of the strip directly to another end of strip creating an almost seamless transition from one piece of strip to the next.

Strip to strip with fly-leads

Connect one piece of strip to another with the flexibility of having fly-leads between them.

High efficacy of 100lm/W

Enlarged connection points for ease of installation

Has a UV resistant, silicone coating to enable cleaning

Beam angle: 120°

5m/100mm

8mm

LSV42

Constant voltage, self-adhesive, flexible IP44 strip

Features

Strip type	Flexible tape
IP rating	IP44
CSP switchable	Single CCT
Bespoke lengths	Yes
Self-adhesive backing	Yes
Dimmable option	Driver dependent
LED/m	120
Input	24V DC
LED lifetime	30,000h L70
CRI	80 Ra
SDCM	5 SDCM

Installation information

Bathroom zone	1
Construction material	Flexible tape with Silicone coating
Maximum running length	5 m
Weight	30g per meter
Maximum ambient temperature	-20°C - 45°C
Electric class (1, 2, 3)	3

Photometrics @ 25°C

Product code	Reel length	W	CCT	△	lm	lm/W	Energy
LSV4227050	5 m	4.8W/m	2700K	120°	410	86	
LSV4230050	5 m	4.8W/m	3000K	120°	425	89	
LSV4240050	5 m	4.8W/m	4000K	120°	480	100	

Wiring information

Cable / flying lead	Supplied with 500mm, 0.5mm² flying lead from one end
Type of wiring required	Parallel

Recommended LED drivers

Product code	Input	SELV	Dimming	Bathroom zone	Products per driver
PS3024B	220-240V	Yes	Yes (with PDCINT 1-10V)	1 (If no water jets)	6m Max

- 9.6W/m** Ideal for atmospheric light with 9.6W/m
- IP44** Ideal for kitchen and bathroom with IP44 rating
- BESPOKE** Bespoke lengths available

Guarantee

3 years

Features & benefits

Excellent for accent lighting

Cut points every 50mm

Quick and easy installation with 3M self-adhesive backing

High efficacy of 99lm/W

Enlarged connection points for ease of installation

Has a UV resistant, silicone coating to enable cleaning

Beam angle: 120°

5m/50mm

8mm

Strip Lights

4.8W/m

Ideal for accent lighting with 4.8W/m

IP20

Ideal for living room and hallways with IP20 rating

BESPOKE

Bespoke lengths available

Guarantee

5 years Cutting to required length will render this product non-returnable

Features & benefits

Cut points are every 100mm

500mm flying leads attached

Has high quality LED strip using current regulation without experiencing any light drop off

Long lengths (up to 20m) suffer no light loss

A foil backed flexible PCB, which dissipates heat (improves LED life and colour stability)

Quick and easy installation with 3M self-adhesive backing

High efficacy of 102lm/W

CRI 90 providing true colour appearance

Beam angle: 120°

20m/100mm

10mm

LSC02

4.8 W/m, IP20, 24V current regulated, high CRI, self-adhesive, flexible strip

Features

Strip type	Flexible tape
IP rating	IP20
CSP switchable	Single CCT
Bespoke lengths	Yes
Self-adhesive backing	Yes
Dimmable option	Driver dependent
LED/m	60
Input	24V DC
LED lifetime	60,000h L70
CRI	90 Ra
SDCM	3 SDCM

Installation information

Bathroom zone	N/A
Construction material	Flexible tape
Maximum running length	20 m
Weight	28g per meter
Maximum ambient temperature	-20°C - 45°C
Electric class (1, 2, 3)	3

Photometrics @ 25°C

PDC/GRID DIMMER	Grid dimmer kit for multiple fitting types	Sold Separately
PDCINT1-10V	1-10V, Push, DALI dimming interface for use with 24V LED drivers	Sold Separately

Strip Lights

17W

Ideal for primary light with 17W/m

IP68

Ideal for wet environments with IP68

BESPOKE

Bespoke lengths available

Guarantee

5 years Cutting to required length will render this product non-returnable

Features & benefits

500mm flying leads soldered

Has high quality LED strip using current regulation without experiencing any light drop off

Long lengths (up to 10m) suffer no light loss

Cut points are every 41.6mm

Quick and easy installation with 3M self-adhesive backing

High efficacy of 82lm/W

High-grade silicone extruded coating, UV resistant

CRI 90 providing true colour appearance

Beam angle: 120°

10m/41.6mm

14x5mm

Strip Lights

Bright enough to be the main, or primary, source of light

High efficiency up to 160 lumens per watt

Dotless light in profile

Guarantee

5 years

Features & benefits

238 Led chips per metre

High lumen output at approx 2000 lm/m

Cut points every 29.4mm

Beam angle: 120°

5m/29.4mm

10mm

LSP

LED Strip Primary, 14W/m, IP20, 5m

Features

Strip type	Flexible tape
IP rating	IP20
CSP switchable	Single CCT
Bespoke lengths	Yes
Self-adhesive backing	Yes
Dimmable option	Driver dependent
LED/m	238
Input	24V DC
LED lifetime	54,000h L70
CRI	80 Ra
SDCM	4 SDCM

Installation information

Bathroom zone	N/A
Construction material	Copper
Maximum running length	5 m
Weight	170g
Maximum ambient temperature	40°C
Electric class (1, 2, 3)	1

Photometrics @ 25°C

Colour Change

Our RGBW range of colour change products provides increased flexibility to improve the atmosphere of indoor and outdoor spaces. The difference between RGB and RGBW is a white LED. Adding white to the colour mix gives the option to create pastel shades as well as vibrant colour choices. RGBW can also be run on white, giving you the option of more natural lighting when required.

To complement our RGBW products we also offer a new control system range. This makes it easy to create different lighting zones allowing individual control of separate areas using a single hand held control, wall mounted control or a smart device App for Android and iOS.

3 Simple steps

Remote to product

Follow the guide below to set up your colour change installation.

Products

What products do you want?

You will need cable to connect your products to your drivers

Drivers

You will need at least one driver per zone, dependant on how many products you would like to install within that zone.

Are you using an RF remote, DMX or DALI control system?

What wattage driver do you need to power your products?

If you want to colour cycle across multiple zone we recommend using power repeaters or for larger projects DMX drivers.

Remotes

How many zones / rooms do you need?

Which remote covers the number of zones you need?

Is a DMX control system already in place or do you need more than 8 zones? (Use a DMX control system in this case)

It is not advised to put RGB & RGBW products in the same zone, as the colours will not always match.

1 Choose your product

Constant current products

Constant voltage product

2 Choose control method and driver

Constant current 75W drivers

75W RF, DMX
and DALI drivers
See page 424

Constant voltage 24V 100W drivers

100W RF, DMX
and DALI drivers
See page 424

Constant Voltage 24V 200W drivers

200W RF, DMX
and DALI drivers
See page 424

3 Choose your controller (RF only)

Wall mounted

Page 423

Zones

Remotes

A zone can cover any space you choose. They are often assigned to rooms so that you can have different colour settings for each room and be able to adjust them completely independently from one another using your remote control. For example...

Remember you can assign any room to any zone number

Once you have decided how many zones you require, you will need to select a remote that is capable of covering that number of zones. You are able to use multiple remotes as long as they are all capable of covering the number of zones you have.

Wall mounted remote control - CCWALLRFW / CCWALLRFB - 1-4 zones

Hand held remote control - CCREMOTEB - 1-4 zones

CollingwoodRGBW app - with CCRFCONVWIFI - 1-8 zones

Zone 1 / 1 Room

Zone 2 / 2 Rooms

Zone 3 / 3 Rooms

Zone 4 / 4 Rooms

CCWALLRFW / CCWALLRFB

Wall mounted RGBW remote control

Controlling Collingwood Lighting's RGB & RGBW ranges could not be easier with this wall mounted remote control. Using radio frequency (RF) removes the need to connect a signal cable to the controller for a cleaner and quicker installation. By simply touching the screen, select solid colours or start a cycle to change the atmosphere. Colours can also be dimmed by holding down the colour button. Select up to 4 zones to give individuality to each room.

Note: The CCWALLRF requires 240V AC supply.

CCREMOTEB

Handheld remote control

Controlling RGB & RGBW lights could not be easier with this remote control. Using RF removes the need to connect a signal cable to the controller for a cleaner and quicker installation. Select solid colours or start a colour changing cycle to create the perfect atmosphere. Colours can also be dimmed by holding down the colour button. From just one remote control you can select up to 4 different rooms and change the colours individually to suit. A maximum of 8 remote controls can be used and programmed to store your favourite colours.

Note: Requires 3 x AAA batteries (not included)

Bedroom 2

Zone 5

Garden

Zone 6

Dining room

Zone 7

Stairs / Hallway

Zone 8

If you require more than 8 zones you will need to use a DMX control system

Zone 5 / 5 Rooms

Zone 6 / 6 Rooms

Zone 7 / 7 Rooms

Zone 8 / 8 Rooms

CollingwoodRGBW App

iPhone, iPad & Android app for wireless control

Control RGB & RGBW products with a smart device for up to 8 zones. By simply touching the screen, select solid colours, start a cycle or control lights via a sound to light option. The app can be downloaded for free on Android and iOS.

Note: Use in conjunction with CCRFCNVWIFI

CCRFCNVWIFI

WiFi to RF converter

Controlling RGB & RGBW products with a phone, computer or tablet could not be easier with the CCRFCNVWIFI. Simply add this unit into your Collingwood Lighting colour change installation and select millions of colours in comfort. Using the CollingwoodRGBW app simply connect directly to the CCRFCNVWIFI or via your own WiFi.

Drivers

Which one and what power supply?

Choose the driver that is required for your installation.

	RF drivers	DMX drivers	DALI drivers
Which driver type do you need?	RF drivers allow wireless control from a hand-held remote controller, a wall mounted touch panel or a phone app via the Wi-Fi converter. A driver can be paired with up to 8 individual remotes and each remote can control multiple drivers in up to 8 zones.	DMX allows for wired control of up to 128 different zones, and multiple drivers can be assigned to each zone to keep the lights perfectly in sync. These drivers also support RDM for more advanced control and management with RDM-enabled controllers.	Use a DALI driver for integration with an existing DALI control system. These drivers allow for up to 16 RGBW zones or up to 64 single-colour zones on a standard DALI system.
75W Driver for all RGBW products excluding LED Strip	 CCDRV75RF	 CCDRV75DMX	 CCDRV75DALI
100W Driver For LED Strip only	 CCDRV100RF	 CCDRV100DMX	 CCDRV100DALI
200W Driver For LED Strip only	 CCDRV200RF	 CCDRV200DMX	 CCDRV200DALI

! If you want to colour cycle across multiple zone we recommend using power repeaters or for larger projects DMX drivers.

Constant current switchable mA drivers

All our 75W constant current drivers are mA switchable, giving you 16 options to choose from, 250mA - 1500mA

Calculate how many drivers you need for the products you have

Must have at least one driver per zone. Can have multiple drivers per zone to get more products within the zone.

75W Constant current drivers

Product code	Product family	Max products per 75W driver	Drive current mA setting
DL329RGBW	Downlight	13	350mA
LL030CARGB	Downlight	13	350mA
LL090RGBW	Downlight	4	350mA
GL016RGBW	Ground Light	13	350mA
GL040CARGB	Ground Light	13	350mA
GL050RGBW	Ground Light	13	350mA
GL090RGBW	Ground Light	4	350mA
UL010RGBW	Feature Light	13	350mA
UL030RGBW	Feature Light	4	350mA
WL070RGBW	Wall Light	1	350mA

100W Constant voltage drivers

Product code	Product family	Max metre length per 100W driver
LSR05	RGBW Strip	6m

200W Constant voltage drivers

Product code	Product family	Max metre length per 200W driver
LSR05	RGBW Strip	13m

Cable run guidance, from controller to products

350mA RGBW products

From power repeater to 350mA product when using **0.5mm cable**, the maximum distance cable run is **50m**

From power repeater to 350mA product when using **0.75mm cable**, the maximum distance cable run is **75m**

From power repeater to 350mA product when using **1.0mm cable**, the maximum distance cable run is **100m**

From power repeater to 350mA product when using **1.5mm cable**, the maximum distance cable run is **150m**

24V RGBW strip

From controller to strip when using **0.75mm cable**, the maximum distance cable run is **20m**

From controller to strip when using **1.5mm cable**, the maximum distance cable run is **40m**

Power repeaters

Which one and how many?

If you are using RF control and you need several different circuits to colour cycle together, you can use power repeaters to extend the output of the driver.

Only required
for RF colour
cycling

For all constant current products use the PR3011

PR3011 - 350mA RGB & RGBW Power repeater

A 350mA power supply for the RGB & RGBW product range. Simply wire up to 100 PR3011 to a driver for a quick and simple colour change installation, giving you the ability to have as many as 600 luminaires per zone.

Calculate how many PR3011's you need for the products you have

NOTE: Tilt and Fountain lights are not suitable with PR3011

Product code	Product family	Max. per PR3011
DL329RGBW	Downlight	6
GL016RGBW	Ground Light	6
GL040CARGB	Ground Light	6
GL050RGBW	Ground Light	6
GL090RGBW	Ground Light	2
LL030CARGB	Downlight	6
LL090RGBW	Downlight	2
UL010RGBW	Pond Light	6
UL030RGBW	Pond Light	2
UL345CARGB	Uplight	1
UL346CARGB	Uplight	1
UL347CARGB	Uplight	1
WL070RGBW	Wall Light	1

For all constant voltage products use the PR3002

PR3002 - 24V RGB & RGBW Power repeater

A 24V power supply for the strip product range. Simply wire up to 100 to a driver for a quick and simple colour change installation, giving you the ability to have as many as 1000 metres of LED strip per zone.

Calculate how many PR3002's you need for the products you have

LSR05 (RGBW strip) - Bespoke lengths available

Length of strip per power repeater	Wattage driver needed	Product (driver)
Up to 2m per PR3002	60W	LSD6024
Up to 5m per PR3002	120W	LSD12024
Up to 10m per PR3002	150W	PSIP15024

! For all strip, you can put up to 5m on one circuit per PR3002, but for 5-10m you will need to put the strip on two circuits per PR3002 (see product instructions).

! Don't forget you'll need 300mm of CF505RGBW cable for every power repeater you use.

Don't forget your 24V driver to power your power repeater

Number of power repeaters	Wattage driver needed	Product (driver)
1	60W	LSD6024
2-3	120W	LSD12024
4-5	150W	PSIP15024

The products will be powered by power repeaters that require a 24V driver. The table shows you which driver you need for the number of power repeaters you are using. **If you require more than 5 power repeaters you will need another driver.**

In the example we calculated that we need 3 x PR3011. Using the table to the left we can see that we need a 100W driver. This means that you will need to order the following...

x3 PR3011 x1 LSD12024

Wiring

For your colour change products

You may need additional cables to connect your colour change products.

CR575RGBW

5-core PVC cable

Product code	CR575RGBW
Construction material	Copper cable
Cable	PVC 5 x 0.75mm ²
Guarantee	1 year extended warranty

Use in conjunction with:

All RGBW products

JB7

LEDRGBWEXT

Colour change extension lead for RGBW products

Product code	LEDRGBWEXT
Construction material	Copper cable (PVC)
Cable	1m (AWG 24) (5 x 0.25mm ²)
Series	Series (Plug & Play)
Guarantee	1 year extended warranty

Use in conjunction with:

DL329RGBW

LL090RGBW

WL070RGBW

CF505RGBW

5-core RGBW ribbon cable

Product code	CF505RGBW
Construction material	Copper cable
Cable	(AWG 24) (5 x 0.25mm ²)
Guarantee	1 year extended warranty

Use in conjunction with:

PR3011

PR3002

DMX RS 485 CABLE

3-core shielded cable

Product code	DMX RS 485 CABLE
Construction material	Copper cable
Cable	0.15mm ²
Guarantee	1 year extended warranty

Use in conjunction with:

CCDRV75DMX

CCDRV100DMX

CCDRV200DMX

Colour Change

RGBW

Coastal protected

IK08 suitable for pathways

Guarantee

5 years

Features & benefits

Installation tube available

Low profile for easy installation

Separate white LED for permanent use

Compatible with a large range of controllers

Marine grade stainless steel for use in outdoor and indoor environments

GL016RGBW

LED colour change ground light (5W max.)

Features

IK rating	IK09
IP rating	IP67
RGB / RGBW	RGBW
Walk over / Drive over	Walk over
Input	350mA
LED lifetime	50,000h L50
CRI	N/A
SDCM	3 SDCM

Installation information

Cut out size	Ø 50mm
Bathroom zone	1
Construction material	Stainless steel (316)
Suitable for coastal areas	Yes
Weight	300g
Maximum ambient temperature	35°C
Electric class (1, 2, 3)	3

Photometrics @ 25°C

Product code	Finish	W	CCT	Beam angle	lm	lm/W	Energy

Coastal protected

IP67 ideal for outdoor areas and under water lighting

Guarantee

5 years

Features & benefits

Complete with wall fixings for easy installation

Can rotate and be angled to direct light

Separate white LED for permanent use

Compatible with a large range of controllers

Marine grade stainless steel for use in outdoor and indoor environments

Beam angle: 45°

Colour Change

RGBW

Ideal for accent lighting with low wattage

IP20 ideal for living room and hallways

Guarantee

3 years

Features & benefits

Cut point every 100mm

Hard-wearing clear covering

Foil backed flexible PCB dissipates heat (improves LED life and colour stability)

50 LEDs per meter in White and RGBW for an even spread of light

3M self-adhesive backing

Supplied in customised lengths (0.1m up to 4.9m in 100mm increments) 5m reel also available

Compatible with a large range of controllers

Beam angle: 120°

5m/100mm

LSR05

Colour change, self-adhesive flexible strip (15W max.)

Features

Strip type	Flexible tape	Bathroom zone	N/A
IP rating	IP20	Construction material	Flexible tape
RGB / RGBW	RGBW	Weight	20g per meter
Bespoke lengths	Yes	Electric class (1, 2, 3)	3
Self-adhesive backing	Yes		
Dimmable	Driver dependent		
LED/m	50		
Input	24V DC		
LED lifetime	50,000h

Lighting Controls

Our wiring and drivers selection will provide all the components required to install our products, providing both ease of installation and maintenance-free installations for many years to come. Offering both wiring and drivers for all Collingwood products, you will receive the same high-quality features and benefits as standard that are provided with our lights.

To complement our RGB and RGBW products, we also offer a range of control systems. Use them to create unique lighting zones which control separate areas with a handheld, wall mounted or smart device control (suitable for Android and iOS.) Also included in our extensive range of control devices is our range of dimmable power supplies, providing the ability to easily control the ambiance of individual zones. Available in 1-10V, DALI or mains dimming, installing Collingwood products as part of a home automation system could not be easier.

Drivers

The ideal driver for every installation

We offer a wide range of drivers, suitable for any environment that are ideal for all Collingwood Lighting products, so you can expect the highest levels of quality and durability throughout your installation.

IP ratings

IP ratings classify the degrees of protection provided against the intrusion of solid objects and water in electrical enclosures.

IP20

Perfect for use indoors and where there is no risk of water splashing the product.

IP44

Ideal for use indoors or outdoors, in bathrooms and other places where water may be sprayed onto the product.

IP67

Suited for use outdoors and near water, but cannot be permanently submerged.

PSIP drivers

We have redesigned our range of IP65 rated drivers that are used with our low voltage landscape products. 350mA and 700mA options are available and wattage range has been extended to allow for more fittings per driver. The drivers also now come with an increased warranty of five years.

Dimming options

As each installation is unique and has individual requirements, choose between mains, 1-10V or DALI dimming options.

Mains

If your product has an integrated mains dimmable driver, no separate driver is required. This is classed as a 'straight to mains' product.

1-10V

With a 1-10V system, all the LEDs connected to the dimmer will dim at an equal amount.

DALI

A DALI system can be structured in a way which allows LEDs to respond to certain rooms or zones. Each LED in the same zone will dim an equal amount.

Plug & play

Installing and connecting a driver is made much easier using plug and play. If you have a suitable product, use one of our plug and play drivers for straightforward installation.

Output classification options – constant current / constant voltage

Constant current LED drivers are designed to deliver a constant output current within a specified output voltage range. Such drives adjust the voltage throughout the circuit and keep the current on each LED constant.

Constant voltage LED drivers are designed to operate at a single, constant output voltage. The most commonly used constant voltage sources are 12 V and 24 V. The constant voltage LED driver takes the mains voltage (220 V AC) and converts it to DC, reducing it to the appropriate low voltage value for the LEDs. The drive will always remain at constant voltage, no matter how much current load. The maximum current that constant voltage drives can reach is determined by the design parameters and this value is written on the driver.

350mA

Use a 350mA driver when powering 350mA products.

700mA

Use a 700mA driver when powering 700mA products.

24V

Use a 24V driver when powering 24V products.

Colour change

Making controlling colour easier

Use our easy to follow step-by-step colour change control guide on pages **420 - 427** and follow the guide to determine what you need for your installation.

Controllers

Offering a choice between hand held, wall mounted or app control, finding the perfect device for you couldn't be easier. Choose the ideal control for the number of zones that you want to manage. See **422 -423** about zones.

CCWALLRFW / CCWALLRFB

1-4 zones
Wall mounted control

CCREMOTE

1-4 zones
Handheld control

CollingwoodRGBW App

1-8 zones
Smart device app for Android & iOS

CCRFCONWIFI

WiFi to RF converter

Drivers

Use the drivers to control your RGBW products, with various options available, RF, DMX or DALI all in 75W, 100W and 200W.

Constant current 75W drivers

Constant voltage 100W drivers

Constant voltage 200W drivers

RF drivers allow wireless control from a hand-held remote controller, a wall mounted touch panel or a phone app via the Wi-Fi converter. **DMX** driver allows for wired control of up to 128 different zones, and multiple drivers can be assigned to each zone to keep the lights perfectly in sync.

Use a **DALI** driver for integration with an existing DALI control system.

Power repeaters

A power repeater can be used to extend the capacity of a driver.

PR3011

Ideal for when using constant current products. With the ability to fit up to 100 of these to a driver, you can have as many as 600 luminaires per zone.

PR3002

Ideal solution for when using 24V products such as LED strip. With the ability to fit up to 100 of these to a driver, you can have as much as 1000m of LED strip per zone.

Products per driver matrix

The table shows the minimum and maximum of each products that fits onto each driver.

Products per driver matrix

Choose the right power repeater and driver

Colour change

For all constant current products you will need the **PR3011** and for all constant voltage products you will need the **PR3002**.

Once you know how many products will be installed in your zone use the relevant tables to work out how many power repeaters you will need and which driver to power them.

Do this
for each
zone

LSR05 - Bespoke lengths available

Length of strip per power repeater	Wattage driver required	Product (driver)
Up to 2m per PR3002	60W	LSD6024
Up to 5m per PR3002	120W	LSD12024
Up to 10m per PR3002	150W	PSIP15024

Power repeater comparison

Choose the right power repeater and driver

	Constant current / Constant Voltage	Rated wattage	Input current	Input voltage	Output current	Output voltage	Ambient temperature (TA=°C)	Case temperature (TC=°C)	Control
PR3011	Constant current	4 x 8.4W max.	1.6A max.	24V DC	4 x 350mA	4 x 24V max.	40°C	70°C	CCDRV100___ CCDRV200___
PR3002	Constant voltage	39W channel max.	6.5A max.	24V DC	4 x 1.6A	4 x 24V	40°C	70°C	CCDRV100___ CCDRV200___

Dimming interface

Choose the right dimming interface

	Type of interface	Rated wattage	Input current	Input voltage	Output current	Output voltage	Power factor	Ambient temperature (TA=°C)	Case temperature (TC=°C)	Control	Double insulation	Efficiency	IP rating
PDCINTI-10V	1-10V for 24V drivers	288W	12A max.	24V DC	12A max.	24V DC	-25°C to 40°C	-25°C to 40°C	70°C	1-10V & DALI dimming		99%	IP20

The products will be powered by power repeaters that require a 24V driver. The table below shows which driver is needed for the number of power repeaters being used.

Maximum cable lengths

Use the tables below for the maximum cable length

The lengths below are guidelines which cover most installations. If an installation requires a longer cable length, it may be possible but a calculation will be needed to confirm it. Please contact our technical support team for further information.

All wiring must comply with national wiring regulations

Constant current drivers

Cable length in metres is from the driver to the last LED unit.
The number of LED's units wired to the driver does not affect the cable length.

Driver	0.2mm ²	0.35mm ²	0.5mm ²	0.75mm ²	1mm ²	1.5mm ²	2.5mm ²
350mA drivers	50m	80m	100m	150m	200m	300m	500m
700mA drivers	25m	40m	50m	75m	100m	150m	250m

Maximum length for a 350mA driver using 1.5mm² cable is 300 metres of 2 core cable using one core for feed and the second core for return.

Single colour 24V DC LED strip (LSV, LSC, Neon, COF)

Recommended maximum cable length from power supply to **start** of strip.

Driver	0.5mm ²	0.75mm ²	1mm ²	1.5mm ²	2.5mm ²
4.8W/m	20m	30m	40m	60m	100m
6.5W/m	16m	25m	32m	50m	80m
8W/m	13m	20m	26m	40m	65m
9.6W/m	10m	15m	20m	30m	50m
14.4W/m	7m	10m	15m	20m	35m
17W/m	6m	9m	12m	18m	30m

Above figures are for a 5m strip length. For a 2.5m strip length, for example, the maximum cable length is x 2.

RGBW products

Maximum cable lengths from power repeater to product.

Power repeater	0.5mm ²	0.75mm ²	1mm ²	1.5mm ²	2.5mm ²
PR3002	50m	75m	100m	150m	250m
PR3011	50m	75m	100m	150m	250m

GL018 0.5W 24V DC drivers

Cable length is from the driver to the last LED unit.

Max product per driver	0.5mm ²	0.75mm ²	1mm ²	1.5mm ²	2.5mm ²
Up to 10 - GL018	100m	180m	220m	360m	550m
Up to 20 - GL018	50m	90m	110m	180m	225m
Up to 30 - GL018	35m	60m	70m	120m	180m
Up to 40 - GL018	25m	40m	50m	80m	130m

Accessories

For accessories specific to product ranges visit the relevant sections.

JB1 (Parallel)

Waterproof junction box

Key features	
Max. voltage	30V DC
Max. current	5A
Max. conductor size	1mm ²
Cable diameter	5 - 6.5mm ²
IP rating	IP68 (2m)
Wiring	Parallel
Inputs	1
Outputs	1 - 3

Use in conjunction with
GL018

JB3

Waterproof junction box

Key features	
Max. voltage	400V AC
Max. current	30A
Max. conductor size	4mm ²
Cable diameter	3 - 12mm ²
IP rating	IP66
Wiring	Parallel
Inputs	1
Outputs	1 - 7

Use in conjunction with
GL007RGBW GL016RGBW
GL040CARGB GL050RGBW
GL090RGBW UL010RGBW
UL030RGBW UL345CARGB
UL346CARGB UL347CARGB
WL021CARGB

JB5 (Parallel)

Gel filled waterproof junction box

Key features	
Max. voltage	250V AC
Max. current	16A
Max. conductor size	1.5mm ²
Cable diameter	6.5 - 12mm ²
IP rating	IP68 (1.3m)
Wiring	Parallel
Inputs	1
Outputs	1 - 3

Use in conjunction with
BL03 GL07
GL007 Frosted GL08
GL09 GL018
GL034 GL038
GL200 SL220 Mains
WL339 WL340
WL341 WL342

JB7

5 pole screw terminal IP68 connector

Key features (RGBW only)	
Max. voltage	24V
Max. current	1.4A
Max. conductor size	4mm ²
Cable diameter	7 - 10.5mm ²
IP rating	IP68 (1.3m)
Wiring	Parallel
Inputs	1
Outputs	1

Use in conjunction with
GL007RGBW GL016RGBW
GL040CARGB GL050RGBW
GL090RGBW UL010RGBW
UL030RGBW UL345CARGB
UL346CARGB UL347CARGB
WL021CARGB

JB2 (Series)

Waterproof junction box

Key features	
Max. voltage	48V DC
Max. current	700mA
Max. conductor size	1mm ²
Cable diameter	5 - 6.5mm ²
IP rating	IP68 (2m)
Wiring	Series
Inputs	1
Outputs	1 - 3

Use in conjunction with
BL01 GL016 GL019
GL021 GL022 GL040
GL041 GL050 GL051
GL063 GL064 GL090
UL010 UL030 SL030
SL130 SL040 SL220
GL100

JB4 (Series)

Gel filled waterproof junction box

Key features	
Max. voltage	120V DC
Max. current	700mA
Max. conductor size	1.5mm ²
Cable diameter	3 - 12mm ²
IP rating	IP66
Wiring	Series
Inputs	1
Outputs	1 - 7

Use in conjunction with
BL01 GL016 GL019
GL021 GL022 GL040
GL041 GL050 GL051
GL063 GL064 GL090
UL010 UL030 SL030
SL130 SL040 SL220
GL100

JB6

Inline IP68 gel filled cable connector

Key features	
Max. voltage	250V AC
Max. current	6A
Max. conductor size	0.75mm ²
Cable diameter	4.8 - 6mm ²
IP rating	IP68 (1.3m)
Wiring	Inline
Inputs	1
Outputs	1

Use in conjunction with
WCR 275 BLACK
Ideal for extending cable when it's not long enough

WC 5-9

Quick release waterproof connector

Key features (RGBW only)	
Max. voltage	250 AC / 50 DC
Max. current	10A
Max. conductor size	4mm ²
Cable diameter	5 - 9mm ²
IP rating	IP68 (1.3m)
Wiring	Inline
Inputs	1
Outputs	1

Use in conjunction with
BL03 GL07
GL007 Frosted GL08
GL09 GL034
GL038 SL220
WL339 WL340
WL341 WL342
GL200

WCR 275 Black

2-core rubber cable

Key features	
Cable	H05RN-F 2 x 0.75mm ²
Material	Copper cable, rubber outer
Length	100m reel
Indoor / outdoor	Suitable for permanent outdoor use

Use in conjunction with	
JB1	JB2
JB4	JB6

WCR 375 Black

3-core rubber cable

Key features	
Cable	H05RN-F 3 x 0.75mm ²
Material	Copper cable, rubber outer
Length	100m reel
Indoor / outdoor	Suitable for permanent outdoor use

Use in conjunction with	
JB1	JB5
WC 5-9	

DMX RS 485 Cable

3-core shielded cable

Key features	
Cable	DMX RS 485 Cable
Material	Copper cable, rubber outer
Length	100m reel or by the metre
Indoor / outdoor	Indoor only

Use in conjunction with	
DMX2102	

CR135

PTFE cable

Key features	
Cable	Red or black 0.2052 PTFE
Material	PTFE
Length	100m reel

Use in conjunction with	
MC010	MC020
MF02 IP	ML01
ML02	ML03
MS02 IP	OCTOLED
UY2 CONNECTOR	

UY2 Connector

Quick waterproof connector

Key features	
IP rating	IP65
Wiring	Series
Waterproof type	Gel
Material	Plastic

Use in conjunction with		
MF02 IP	ML01	ML02
ML03	ML010	ML020
MS02 IP	OCTOLED	

PDC/Grid Dimmer

Grid dimmer kit for multiple fitting types
Requires 2-core screen cable

Constant voltage	
Dimming	1 - 10V
Min. load	1 driver
Max. load	1 - 7 drivers

Constant current	
Dimming	1 - 10V
Min. load	1 driver
Max. load	1 - 7 drivers

Use in conjunction with	
PS5024*	PS7524
PSIP25024	PS1524
